## The Neurosequential Model of Therapeutics©

*Mentor-led NMT Training Certification*

NMT Training Certification – Phase I

Phase I provides an in-depth introduction to the NMT and the key principles that underlie the clinical application of model. The primary focus of Phase I is to build comfort with, and experience in, organizing clinical information in a neurodevelopmentally-informed way; a primary objective of Certification is to develop competence with the web-based NMT Clinical Practice Tools (NMT Metrics). The NMT Training Certification Program is a year-long training process that includes a combination of live and self-directed learning opportunities. Participants are required to join a study group that meets virtually twice per month to review learning and discuss case-studies.

Mentor-led Training Groups

The Neurosequential Network now offers NMT Phase I Training Certification through Mentor-led training groups. NMT Mentors have successfully completed NMT Phase III training including training in the NMRS (Neurosequential Model in Reflection and Supervision) and have been active and engaged leaders in the NM-community for a minimum of 5 years. Mentors are approved to independently offer NMT Phase I Certification in coordination with the Neurosequential Network. Mentor-led training groups have the benefit of being region-centric and will tend to be smaller than NMN-organized training groups.
