Pinpoint Pins — Privacy Policy

Effective date: November 16, 2026

Pinpoint Pins is a browser extension that lets you bookmark ("pin") messages and paragraphs in AI chat conversations and jump back to them later. This policy explains what data the extension handles.

1. What the extension stores

When you create a pin, the extension saves on your device:

- the name you give the pin
- a short text snippet of the pinned message or paragraph (which may include text you wrote or text from the AI's reply)
- the address (URL) and title of that conversation
- technical position data used to find the message again (such as its position in the chat and a hash of its text)
- the time the pin was created

This data is stored only in your browser using Chrome's local extension storage (chrome.storage.local). It is never sent to us. We do not operate any server and do not receive your pins.

2. Pro license verification

If you buy Pinpoint Pins Pro and enter your license key, the extension sends that license key to Gumroad's license verification service (api.gumroad.com) to check that it is valid. This is the only network request the extension makes, and it happens only when you activate a license.

Gumroad's response includes the email address used for the purchase. The extension saves your license status, license key, and that email address in Chrome's sync storage (chrome.storage.sync), so your Pro status follows you across your own Chrome profile if Chrome sync is turned on. Gumroad's own privacy policy applies to your purchase: https://gumroad.com/privacy

3. Where the extension runs

The extension runs only on these sites: chatgpt.com, chat.openai.com, claude.ai, gemini.google.com and chat.deepseek.com. It reads the page only to add pin buttons and to find pinned messages.

4. What we do not do

- We do not collect, sell, rent or share your data.
- We do not use analytics, tracking, advertising, or cookies.
- We do not use your data for any purpose other than the extension's pinning features.
- We do not use your data to determine creditworthiness or for lending.

5. Deleting your data

You can delete any pin from the sidebar at any time. Uninstalling the extension removes all data it stored in your browser.

6. Changes
If this policy changes, the updated version will be posted at this same address with a new effective date.
