JLWR's review assessment form

No	Review aspect	Reviewer-..	
		Yes/No	Comments
1	Does the abstract shortly synthesize the background and the aim of the study, the scientific/ practical contributions, the plausible methodology, and concisely illustrate the results and the conclusion of the study?		
2	Does the introduction synthesize the appropriate background to conduct the study?		
3	Are there enough references in the introduction to postulate the necessity of the study?		
4	Is there clear research question and aim of the study in the introduction?		
5	Does the methodology sound plausible and robust given the flow of the works, the underlining theory, and the cited references to support the methodological choices?		
6	Are the results illustrated and described clearly, including the legend and the numbers or equations?		
7	Are the figures and tables related and supporting the aim of the study?		
8	Are the discussions related to the obtained results and to the aim of the study?		
9	Are the discussions brought widely to reach larger audiences and to face the global challenges?		
10	Are there enough references and valid evidence in the discussions?		
11	Is the conclusion a statement of the significance of the study and future or wider statement or application? Please kindly remember that the conclusion is not a summary of findings.		
The study is therefore suggested to be (choose one option) 1. Accepted 2. Suggested for a revision 3. Rejected
