CLIMATE LEARNING SESSIONS

Feed back sheet:

Who	Date	Sequence	Comments
John	Jan 12th	Opening seq - before titles	I'm wondering if this should be just a voice with images in the background, or if it should be the presenter talking directly to camera.
Arya / john response	Feb 1st	Session 1 overview: In the beginning	I think it would be a great idea to go more in depth about the Earth's natural cycles/the time frames of earth's previous climate changes. From what I've heard, many teens don't believe in climate change because they think "the climate has always changed", but don't understand that the rate at which we are changing it is the real problem. Thanks - we'll incorporate this into the script
Arya / john response	Feb 1st	Session 1 overview: What can I do	Small typo: "We conshear about it. Have you experience of: " Also, I think it would also be good to talk about how extreme cold in addition to extreme heat can also be a result of climate change (due to unstable polar vortex), as that is another reason many don't take climate change seriously. Also - fix typo & incorporate vortex info
