Privacy Policy for Azgard's Tradingview Optimizer

Last updated: [12/03/2026]

Azgard's Tradingview Optimizer ("the Extension") is a Chrome extension that helps users optimize TradingView strategy parameters through automated backtesting and display external buy/sell signals on charts. This Privacy Policy explains what data the Extension collects, how it is used, and how it is stored.

---

1. Data We Collect

1.1 Data Stored Locally (Your Device Only)

The Extension stores the following data in your browser's local storage. This data never leaves your device unless you explicitly export it:

- **Optimization results** — Parameter combinations, backtest metrics, and related data from your strategy optimization runs
- **User settings** — Your preferences (e.g., theme, language, backtest delay, optimization method)
- **External signals** — Buy/sell signal data you upload from CSV files for display on charts
- **Installation ID** — A unique identifier generated for your installation, used for subscription verification

1.2 Data Used for Subscription Verification

To verify your subscription status, the Extension may send the following to our license verification service:

- **Installation ID** — The unique identifier for your extension installation
- **TradingView username** (or a hash of it) — To match your account with an active license

This data is used solely to confirm whether you have an active subscription. We do not store this data for analytics or marketing.

1.3 Data We Do NOT Collect

We do not collect:

- Your name, email address, or other personal identification
- Payment or financial information
- Browsing history outside of TradingView

- Location data
- Any data from websites other than TradingView (when you use the Extension on chart pages)

---

2. How We Use Your Data

- **Locally stored data** — Used only to provide the Extension's features: resume optimization, restore results, remember your settings, and display your uploaded signals
- **Subscription verification data** — Used only to check if your Installation ID and TradingView account are associated with an active license
- **No selling or sharing** — We do not sell, rent, or share your data with third parties for marketing or advertising
- **No credit or financial profiling** — We do not use your data to assess creditworthiness or for lending purposes

---

3. Permissions Explained

Permission	Purpose
storage	Save optimization results, settings, and signals locally in your browser
unlimitedStorage	Store large optimization result sets that exceed standard storage limits
activeTab	Access the TradingView chart tab only when you use the Extension
identity	Verify your subscription status
Host access (tradingview.com)	Run backtests and read strategy data on TradingView chart pages

---

4. Data Storage and Security

- Data stored locally remains on your device and is not transmitted to our servers except for subscription verification
- Subscription verification uses secure communication
- You can clear all Extension data at any time via your browser settings or the Extension's "Clear all data" option

---

5. Third-Party Services

The Extension may use:

- **Google services** — For license verification (e.g., Google Sheets API) if applicable
- **TradingView** — The Extension operates within TradingView; TradingView's own privacy policy applies to your use of their platform

We do not use third-party analytics or advertising trackers.

---

6. Changes to This Policy

We may update this Privacy Policy from time to time. The "Last updated" date at the top will reflect the latest version. Continued use of the Extension after changes constitutes acceptance of the updated policy.

---

7. Contact

For questions about this Privacy Policy or the Extension, contact: https://t.me/azgards_codes or khoopenai@gmail.com

---

This extension complies with the Chrome Web Store Developer Program Policies and the Google API Services User Data Policy, including the Limited Use requirements.
