For this section title use 12 pt, bold, Times, title case with 6 pt spacing to the body text. For the body text use 11 pt Times with **1.5 (one and half) line spacing** between lines, 12 pt spacing between paragraph and 18 pt spacing for the next heading.¹

Note to Author : To apply the style in whole manuscript accordingly, simply copy your draft to this template, then paste the content to this file and follow the instructions on Section 2.

2 Page Layout, Style and Formatting

For this template, use the custom margin in **Page Layout** menu: Top and Left margin are 4 cm, Bottom is 6.5 cm and Right is 4.5 cm. Gutter position is Left. Orientation page is Portrait. Print the article on one side of good quality A4 paper.

The built-in styles that we provided and used in this paper are:

1. Title, for paper's title

¹ For typing footnote, simply choose *Insert Footnote* on the menu bar, it numbered automatically.

2. **Author**, for author's name
3. **Address**, for author's address
4. **Abstract**, for abstract
5. **Heading 1**, for section title
6. **Heading 2**, for sub section title
7. **Heading 3, 4, 5, 6, 7, 8, 9** for the next sub ... sub-section title
8. **Text**, for body text
9. **Equation and Enumeration**
10. **Figure**, for figure caption
11. **Table**, for table caption
12. **Reference**, for references
13. **Acknowledge**, for References and Acknowledgement header

This template is already set for the paper in *style and formatting*, so you can use those styles by typing the style name in the **Style** box as shown in the figure below:

2.1 Mathematical Formulation

Equations should be typed with indent 1.27 pt, and numbered consecutively starting with (1) set flush right. To set the style, type *Equation* in the **Style** box, or from **Style Menu**. But this style only sets the tab stop position. To put the equation to the right just press the **Tab** button one time. And to type the equation number, press the **Tab** button once again from the right side of the equation.

$$x^2 + y^2 = z^2 \quad (1)$$

For numbering, use ordered numbers (1), (2), (3), and so on. Do not order by Chapter i.e (1.1), (1,2), (1,3). For refering an Equation in the body text, please use “Eq. (1)”.

2.1.1 Section and Sub-section Title

Just type *Heading 1* for section title, *Heading 2* for sub section title, and *Heading 3* for sub sub-section title. The number will set automatically.

2.1.2 Figures and Tables

All figures and tables should be centered and numbered consecutively. Use the Figure and Table Style for every description of a figure and table respectively

Figure 1 Type *Figure* in the style box. The caption should be typed in lower case. Choose *center* if the caption fit on one line.

Table 1 Summary of physical parameters.

No	Segments	Length (km)	Elevation (meter)
1	A-B	25	30
2	B-C	75.15	10
3	C-D	44.75	50
4	D-E	72.5	10
5	E-F	21.25	10

3 Length

The maximum length of article is **15 pages**, including all pictures, tables, nomenclature, references, etc.

4 Nomenclature (if necessary)

List the nomenclature in alphabetical order. List Roman letters followed by Greek symbols followed by subscript and superscripts.

A	=	Amplitude
C_d	=	drag coefficient
f_e	=	linearization coefficient
K_i	=	modification factor
ν	=	wave number
ψ	=	Complex wave number

5 References

Within the text, references should be cited by giving the last name of the author(s) and numbered consecutively starting with [1], i.e:

“Some results from the experiment were given by Wijaya and Riyanto in [1], Wijaya *et.al* in [2], Majerski and Przybylo in [3], Nurdin *et al.* in [4] and [5].”

Or number citations consecutively in square brackets [1.], ie:

“There are many forms of this, such as hard [1], soft [2], curable, incurable [3], true, and breakdowns [4,5].”

Note that in the case of three or more authors, only the last name of the first author is cited and the others are denoted by, “*et al*”. **The same rule is also held for the header title on even pages (see Header in top of Page 2).**

Within the Reference chapter, use the same typeface as the body of the text for the references, or just find *Reference* in **Styles windows**. In References chapter you should write based on order of appearances, not alphabetically. Example of References:
