List of AYN Thor games that uses the second screen

This list that I'm making is a work-in-progress. More games will appear on this list as more get dual-screen modifications on the AYN Thor. If there's any more dualscreen ports or mods, and/or if there's any features that I missed, I'll make updates as I go along.

EDIT: I'll be posting links too, so that you'll know where to find them.

AI Generative / AI Assistance Disclosure

Any game or mod that has this symbol * it means it's either been generative vibecoded or it's been AI assisted to help with tedious tasks with some testing to polish things up. If there's an AI game or mod that has AI used that I missed, please let me know.
