February 16th, 2024: Paralives Developer Weekly Chat

This weekly chat with Paralives devs is shared for the next couple of years. Every week, you can ask a few questions to any developer from Friday 12PM to Monday 12PM ET and they will get back to you with their answers the next Friday.
Updated FAQ: pinned_comment/reviews for details.

🌟 Community's choice question

This question got 7 votes from the Super Patrons on Discord!

FreaEric:
Hey devs, do you think that if a puddle (from a broken shower, for example) is left to dry naturally instead of being cleaned up, it has a small chance to spawn mold instead, which is much more expensive to clean up?

Anna:
That is actually feasible with existing features! Not 100% sure we're going to go for it but I agree that's a logical way for puddles to work!

🎮 General questions

Amazing_Star 🌟✨:
I have to ask about this one - can you see more about the triangle and apparently ballet bar in the buy mode? Are these another skills or in case of triangle just object for fun / maybe general music knowledge?

Alex:
These are just decorative items! :)

Amazing_Star 🌟✨:
This is something I have been wondering about for a while - what is the line between what you can add to the game and what will be a mod? Like I understand that some complex features, not add yet for example, are for mods but seeing questions about Wolvesec - this is pretty frequently asked question in this chat from what I've noticed and the answer is usually that it's planned for the game but not now and then I see complicated systems or don't think Pascal would want to be mod.
So let's say if there's big demand for something you are not considering, would the big demand change your mind or would it remain a mod because it seems ballets matter more? Two examples here - Life By You team changed their initial idea about violence and accidental deaths in game after big demand from players. Or Sims 4 team added pools after 10 years of not including in initial bundle. So in summary - Life By You is under a big studio, so that makes sense. In case of your game, for examples illnesses again - if there was big demand for a more complex illness system, would you add it to the game or would it be a mod? Or is it a mod from the start? Is the lighter gameplay? A general question on how the players demand matters and if there's some stuff obviously that this wouldn't fit / being or aren't needed to accessibility as they would big game or problematic? Or you just don't want to consider because you think it's for the best?

Alex:
We currently have a set of high priority core features planned for the initial Early Access release of the game. Then, we will consider extra features after launch. There are some features like Wolvesec that we know we will not add to the game ourselves, but we'll leave the door open for the game. Illnesses are not completely out of question. It could work if it brings interesting gameplay and it's not just a random thing that your Paralife gets and they have to live with it and it just becomes a tedious task of taking daily medicine or something you try to ignore. I could imagine a Pea catching the flu and you would have to avoid physical contact with other Paras or they would get sick too, and then you'd have to buy them medicine and make sure they take it. Pascal would want to test that out a lot, so it wouldn't impact the gameplay in frustrating ways. In short, we want the gameplay to be fun and not tedious. I know some people would like a hyper realistic simulation where you have to eat and sleep and shower, but that's not the direction we are going from our vision for Paralives. Modders should be able to add this kind of gameplay though!

Iserran:
Have you guys thought about the release schedule/frequency for updates during early access, or is that too far ahead?

Alex:
It will depend on the order we decide to develop the missing features and if we decide to do small updates or bigger ones with more things at once. To be decided :)

Jamie:
This system could be a bit too complex but it would be very useful for when building, there could be a "Gameplay Functionality Check" notification to make sure everything in the build mode/buy mode is functional and not broken, like if a door is placed in a way that it can't be opened. If you put a stove down and a counter right in front of it, it would say in the ui that the stove is not usable. Of course to some people, this would be annoying but if there was a toggle, I think it would be a big benefit. Will they be on many people, including me?

Alex:
That would be really useful and we were thinking of adding something like this in the future! Not sure yet if it will make it for the initial Early Access though!

Alex:
Sharmaigne and appolaki for the early birthday gift! Not sure if and how these could be changed

---

We are planning to support Steam cloud saves and it will be easy to disable it :)

🐈 Devs questions

Gui
Time for the call roll! Hi Alex! How are you? How was your week?

Hey Gui! I'm doing great, thank you!

Hi Lisa! How are you? How was your week?

Lisa:
Hello Gui! I've been pretty sick lately so really it was just about resting as much as I can 😭 Hope your week was more than mine! 😅

Hi Anna! How are you? How was your week?

Anna:
Hi Gui! I'm good, thank you!

Hi Alizah! How are you? How was your week?

Alizah:
Hello Gui! I'm very busy with adult non-tuff these days, other than that everything is fine! I finally started playing Octopus Eldritwerk's OLC). It is a cute little farming game and the pixel art is, again, amazing!

Hi Jérémie! How are you? How was your week?

Jérémie:
Jérémie is away this week!

Hi Sonia! How are you? How was your week?

Sonia:
Hey, im good thanks! I had a nice week

Hi Andrée! How are you? How was your week?

Andrée:
Hey Gui! I'm doing well!

Hi Chloé! How are you? How was your week?

Chloé:
Good Gui! I'm doing great, I hope you had a nice week too 😊 I can't wait for the release of Final Fantasy 7 Remake Part 2! Seriously, I'm so excited!!!

Anna:
Yes it could definitely be possible, at least technically! I don't know if we're going to have it for sure but I like the idea.

FrostEnt:
I know we're a long ways from cars yet, but do you think visiting friend parafolk will park on the street instead of taking up their hosts' driveway?

Anna:
That's a good question, sadly I have no idea how parking will work yet haha!
In a perfect world I guess they would park in the closest parking spot to the target lot, which might be on the street. We'll see, it's a bit too soon to know!

Megan5:
Hello, I have been gone for ages but I'm braving Discord again!

Anna (or anyone who wants to answer) have genetics been worked on at all lately? What about animal genetics?

If the answer is "sorry, no update" feel free to share your favorite random genetics fact?

Anna:
Hi Megan, welcome back!
No, genetics haven't been worked on for a while. Animals have not been worked on at all, their genetics either!
As for the random genetics fact, I really like the fact that evolution keeps making crabs!
It's called convergent evolution: all crab families that we can observe now did not evolve from the same common ancestors. It's almost like being a crab is the optimized way of living! It's not the only hypothesis of course, but I like to think of crabs like superior beings because I think they're both scary and cute.

Build mode

Amazing_Star 🌙🌈🍉 :
As you are approaching the stairs system, are ramps and elevators something you are considering to add as well or is that a matter of EA or future?

Anna:
They are definitely considered, probably for future updates though!
