basis, meaning that vehicles with odd-numbered model years are tested on odd-numbered calendar years and vehicles with even-numbered model years are tested during even-numbered years. In Cache County, vehicles are not required to be inspected during the first 5 years after manufacturing. Vehicles that are 6 or more model years old must obtain a smog certification every other year, on the same odd/even basis described above. Some vehicles, including older models without OBDII systems, will have a tailpipe inspection where an instrument inserted into the tailpipe captures and measures emission gasses. Other types of emissions testing may take place as part of a full vehicle inspection, depending on the age of the vehicle and the type of fuel it uses. In Utah County, emissions testing is not required on diesel vehicles of any age.
