NFPA Executive Director Mission-Directed Activities and Business

Monthly Report – Addendum – Sept. 14, 2020

July 27 – Sept. 6, 2020

The following information is from the week of September 7 – 13, 2020:

Participated in a webinar titled *Attracting Exhibitors to Virtual Conferences.* Good information should the NFPA need to go virtual for our conference in 2021.

Call with the NFPAti.org oversight committee with Centene participants. On the call were two Centene staff, Shawn Johnson, Cate Hawks, and myself. Very productive.

- Centene will schedule a webinar recording with Marcus Stallworth soon on Fatherhood.
- They are also working with Cate to identify a physiatrist to do a webinar on the use of psychotropic medications that will answer questions that parents may have when such medications are prescribed for children/youth in their care. Cate has identified a very qualified person to do this webinar and he has agreed to do it soon. He may also do a Ten Minute Rescue as well as be a guest on Coffee with Caregivers in the new year.
- Discussed the webinars being recorded by the Child Welfare Information Gateway. Irene contacted them after the call and they sent five recordings to Shawn. Those are downloaded and will be added to the website at a rate of one per week. These are all workshop sessions the Conference Steering Committee had selected for our 2020 conference. The Gateway is currently scheduling a number of additional webinars to be recorded from the list we gave them from the 2020 conference list.
- We announced that we have secured a 4-part series on Fatherhood to be recorded over two days later this month. We are excited about this new series. Thanks to Rhonda Sciortino for the referral to this very qualified presenter.

Two new Coffee with Caregivers episodes were recorded during the week.

Cate Hawks asked me to be her guest on a Facebook event for Virginia families and that was recorded this week also.
