PosterGenius AI – Email Swipes

Email 1 – Pre-Launch Teaser

Subject Line Options:

- Something new for printable poster creators
- This makes AI poster prompts much easier
- New AI poster prompt chatbot launching soon

Email Body:

Hi [FIRST NAME],

If you have ever tried creating printable poster images with AI, you probably know the hardest part is not always the image tool itself.

It is the prompt.

A weak prompt usually gives you messy layouts, random details, poor poster structure, or images that look more like a collage than a clean printable poster page.

That is why I wanted to let you know about a new tool launching soon called **PosterGenius AI**.

PosterGenius AI is a guided AI prompt chatbot that helps you turn a simple poster idea into a complete, detailed, AI-ready prompt for printable poster pages and poster sets.

You do not need design skills.

You do not need prompt-writing experience.

You simply answer a few guided questions, and PosterGenius AI builds the poster prompt for you.

It can help create prompts for poster pages, educational-style posters, printable packs, themed poster sets, visual learning pages, and digital download-style products.

It officially launches on **June 20th at 9:00 AM EST**.

I will send you the link when it goes live.

[YOUR NAME]

Email 2 – Launch Day

Subject Line Options:

- PosterGenius AI is live
- Create printable poster prompts in minutes
- New today: PosterGenius AI

Email Body:

Hi [FIRST NAME],

PosterGenius AI is now live.

This is a simple AI prompt chatbot that helps you create detailed printable poster prompts in minutes.

Instead of trying to write the perfect AI poster prompt from scratch, you answer a few guided questions such as:

- Your poster topic
- Your poster style
- Your main subject or character
- The number of poster images you want
- The image size
- The output language

Then PosterGenius AI turns that information into a complete AI-ready prompt you can use with your preferred AI image generator.

This is useful if you want to create:

- Printable poster pages
- Poster sets
- Educational-style posters
- Homeschool printables
- Digital download products
- PLR-style poster packs
- Bonus poster products
- Visual learning pages

One of the best parts is that one prompt can be built for **1–10 poster images**, depending on what you choose inside the chatbot.

You can check it out here:

[YOUR AFFILIATE LINK]

PosterGenius AI is especially useful if you like creating printables, prompt-based products, classroom-style visuals, KDP-style content, or digital download assets.

Email 3 – Problem / Pain Point

Subject Line Options:

- AI poster prompts can be frustrating
- Why your poster images may look messy
- The prompt is usually the problem

Email Body:

Hi [FIRST NAME],

Creating printable poster images with AI sounds simple at first.

You type in a topic, ask AI to create a poster, and hope the result looks good.

But in reality, the output can often be messy.

Sometimes the image looks like a collage.

Sometimes the layout is not printable.

Sometimes the text is unclear.

Sometimes the background is too plain.

Sometimes the style is inconsistent.

And sometimes the image generator simply does not understand what kind of poster page you actually want.

That is where **PosterGenius AI** can help.

PosterGenius AI does not generate the image directly.

Instead, it helps you create a stronger, more detailed prompt.

It guides you through the important details and then creates a polished AI-ready poster prompt that includes things like:

- Poster topic
- Poster style
- Main subject or character
- Page layout
- Background direction
- Printable poster format
- Number of poster images
- Clean full-page instructions
- Output language

This makes it much easier to get better poster-style results from your preferred AI image generator.

You can see PosterGenius AI here:

[YOUR AFFILIATE LINK]

If you create printables, poster packs, digital downloads, PLR-style products, or educational-style visuals, this can save you a lot of time.

Email 4 – One Prompt Creates 1–10 Poster Images

Subject Line Options:

- One prompt can create up to 10 poster images
- Create 1–10 poster images from one guided prompt
- This is useful for poster sets

Email Body:

Hi [FIRST NAME],

One thing I like about PosterGenius AI is that it is not just for creating a single poster prompt.

Inside the chatbot, you can choose how many poster images you want the prompt to create.

That means you can build a prompt for:

- 1 poster image
- 3 poster images
- 5 poster images
- 8 poster images
- Up to 10 poster images

This is useful if you want to create a complete poster set instead of only one standalone image.

For example, you could create a poster set around topics like:

- Animal habitats
- Ocean life
- Weather
- Dinosaurs
- Geography
- Plants
- Solar system
- Human body
- Life cycles
- Insects

PosterGenius AI then helps structure the prompt so the poster pages feel more organized, more consistent, and more printable.

This is a great fit for printable creators, digital download sellers, PLR creators, teachers, homeschool creators, and anyone creating visual learning content.

Email 5 – Main Character / Unique Poster Angle

Subject Line Options:

- Make poster sets feel more unique
- Add a consistent character to poster prompts
- This helps posters feel less generic

Email Body:

Hi [FIRST NAME],

A lot of AI poster images can feel generic.

The topic may be good, but the final poster does not always feel like a connected product or themed set.

One thing that makes **PosterGenius AI** interesting is that it can help users include a consistent main character, guide, mascot, or presenter inside the prompt.

For example, you could create poster prompts with a:

- Cute animal guide
- Friendly teacher character
- Astronaut bear
- Penguin learning buddy
- Owl classroom helper
- Dinosaur guide
- Smiling sunflower presenter
- Cute robot assistant
- Sea turtle adventure guide

This makes the final poster set feel more creative, more memorable, and more product-like.

Instead of creating plain poster pages, buyers can create poster prompts with a clear topic, rich background, printable layout, and a consistent character direction.

That is useful for creating:

- Poster packs
- Printable bundles
- Educational-style visuals
- Homeschool pages
- Digital download products

- PLR-style products
- Bonus poster sets

You can see PosterGenius AI here:

[YOUR AFFILIATE LINK]

If you want to create poster prompts that feel more polished and less generic, this is a useful tool to have.

Email 6 – Who It Is For

Subject Line Options:

- Who should use PosterGenius AI?
- This is for printable and AI creators
- A simple tool for poster prompt creation

Email Body:

Hi [FIRST NAME],

PosterGenius AI is a good fit for several types of creators.

It is especially useful if you create or want to create:

- Printable products
- Digital downloads
- Poster sets
- Educational-style pages
- PLR content
- KDP-style visual content
- Homeschool printables
- Classroom visuals
- Bonus products
- Prompt-based products

The idea is simple.

You enter your poster details into the chatbot, and PosterGenius AI creates a complete AI-ready prompt for you.

Then you can use that prompt with your preferred AI image generator.

This helps remove a lot of the guesswork from prompt writing.

You do not have to figure out the layout, style, page structure, character direction, and printable instructions by yourself.

PosterGenius AI does that part for you.

You can check it out here:

Email 7 – Reminder

Subject Line Options:

- Reminder: PosterGenius AI is live
- Did you see PosterGenius AI?
- Still want easier poster prompts?

Email Body:

Hi [FIRST NAME],

Just a quick reminder that PosterGenius AI is live.

This is the new AI prompt chatbot that helps users create complete printable poster prompts in minutes.

It is designed to help with things like:

- Poster topic structure
- Visual style direction

- Printable layout instructions
- Main subject or character guidance
- Background direction
- Number of poster images
- Output language
- Clean full-page poster instructions

The front-end includes 10 focused poster topic categories, making it easy for buyers to get started quickly.

And one prompt can be built for up to 10 poster images.

This is helpful if you want to create complete poster sets instead of single random images.

You can check it out here:

[YOUR AFFILIATE LINK]

PosterGenius AI is not an image generator itself.

It creates the prompt you can use with your preferred AI image generator.

That makes it a practical tool for printable creators, AI users, digital product sellers, PLR creators, teachers, and homeschool creators.

Email 8 – Last Call / Final Reminder

Subject Line Options:

- Last call for PosterGenius AI
- Final reminder: PosterGenius AI
- Before you miss this

Email Body:

Hi [FIRST NAME],

This is a final reminder to check out PosterGenius AI.

If you want an easier way to create detailed printable poster prompts, this is worth grabbing.

PosterGenius AI helps you turn a simple poster idea into a complete AI-ready prompt with details such as:

- Topic
- Style
- Main subject or character
- Layout direction
- Background details
- Printable poster instructions
- Number of poster images
- Output language

It is useful for creating poster pages, poster sets, classroom-style visuals, homeschool printables, PLR-style poster packs, digital downloads, and bonus products.

The biggest benefit is simple:

You do not have to write the full poster prompt from scratch.

The chatbot guides you and creates the finished prompt for you.

You can see PosterGenius AI here:

[YOUR AFFILIATE LINK]

If you work with AI images, printables, digital products, or prompt-based products, this can make the process easier and faster.
