Interactive Museums for Language Arts and Social Studies
Danielle Corrao, PA (NOTE: Haven't checked to guarantee these links don't require a login. I'm working on that. 7/20/20

This session will give ideas on different ways to create interactive museums that tie in both reading/literacy skills and social studies. Two main examples will be on the topics of Greek Mythology, 9/11, and children's books. Videos on Greek Mythology as well as videos from Discovery Education's Museum Access Channel will be featured.

Older Handouts

This server is no longer.
The list for reference only. I will get this re-uploaded. If you need any of these specifically, let me

know with direct message at Twitter @halldavidson

Presentations and handouts:
Note: Downloaded PowerPoints may have trouble opening on some machines because the videos are not attached. It takes time for the machine to attempt to find each attached video. Eventually, it offers the choice to download without videos.The **pdf's** are safer and should download without problems. Attaching videos would make the downloads impossibly large. Be sure to check the pdf's and presentations before you print hardcopy. Many contains pages in addition to what was presented. These are valuable for reference but you may not need a hard copy.

Note that many of thePowerPoints are the newer Microsoft Office .pptx format. They should open in previous versions of Microsoft PowerPoint. The files were created in PowerPoint on either Mac or PC. Many of these files are large. I apologize in advance for the download time. Shortened URL for this page ishttp://tinyurl.com/4xzktwf.
For questions regarding presentions in person, contact Chrysti Hill by phone at 240.662.2831 or by email.
or by email.

GoogleEarth(ppt)
Codes for Pasting in GoogleEarth (pdf)
Sample kmz files to use for copy and paste are here in an older blog post. More blog posts.

Note on Media in Google Earth: When saving a Placemark with embedded flash video, the video file does not come with the saved file. An embedded image in a placemark does, but the flash apparently does not. Although I was certain I had embedded flash in a save file, I cannot duplicate this so must conclude that currently an embedded flash file doesn't attach. This is a change in the new versions Google Earth. Who knows what will happen in future versions. Whether the image comes along also depends on the version of GE.
More detailed information on embedding video in the description box at blog post

Web 2.0 site list (doc)
GoogleEarth(ppt)
Codes for Pasting in GoogleEarth (pdf)
Sample kmz files to use for copy and paste are here in an older blog post. More blog posts.

Note on Media in Google Earth: When saving a Placemark with embedded flash video, the video file does not come with the saved file. An embedded image in a placemark does, but the flash apparently does not. Although I was certain I had embedded flash in a save file, I cannot duplicate this so must conclude that currently an embedded flash file doesn't attach. This is a change in the new versions Google Earth. Who knows what will happen in future versions. Whether the image comes along also depends on the version of GE.
More detailed information on embedding video in the description box at blog post
