Original Game: Rock Paper Scissors

Rock = R
Paper = P
Scissor = S

P beats R
S beats P
R beats S

Proposed New Game: Two Hands Rock Paper Scissors

How to Play: Play two hands at once. Both hands need to be different.

Possible (Left, Right) combinations:

(R, P)
(R, S)
(P, R)
(P, S)
(S, P)
(S, R)

How to win: The player *wins* if he/she either (1) wins both hands or (2) wins one hand and draws the other hand. The game is a *draw* if both players win one and lose the other hand, or both hands are tied.

Winning hands:
(R, P) beats (R, S) and (P, R)
(R, S) beats (R, P) and (S, P)
(P, R) beats (P, S) and (R, P)
(P, S) beats (P, R) and (S, R)
(S, P) beats (S, R) and (P, S)
(S, R) beats (S, P) and (R, P)

Why it's fun: It's mentally more challenging to play two hands at once with both hands having to be different. Each combination of hands can beat two different hand combinations. There are more ways to win. Give it a try!
