Pepe Bot

2020 Version
Beta release starting on April 16.

Preface

In this document, you will find all you need to know about the new Pepe Bot. What's new? How to get started? What changed? Why "beta"? I found a bug? .. and more. We've tried to be as clear as possible to make everything easy for you, but if you still have questions after reading this, please feel free to reach out to us.

Overall, we believe ***the new bot is much, much better than the old one***. We've rewritten the entire bot from scratch and started with writing a good core and wrote everything with scalability in mind. We may need to upgrade hardware if the bot grows beyond one million users *again*, but at its core, Pepe Bot should have no problem handling this now. This means Pepe Bot is:

- Faster
- Cool leaderboards
- Stable uptime
- Fast & frequent updates
- Easier-to-use commands
- ***Soon:*** *Website*

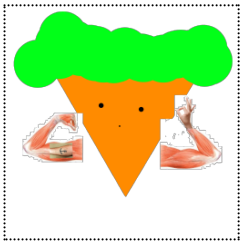
The Team

Pepe Bot is developed by a team of ~~LOSERS~~. Here's some info about them:

Bratatat - *Founder*
Pepe Bot was founded by Bratatat, the ***weird*** lil' gun guy who owns Utopia & sells ads on discord. He started it a couple of years ago as a private bot and ran it alone until the rest of the team came along. He's the head-developer on the team and because of his close relationship with the bot, he's still passionately working on it on a daily basis. *Don't be afraid to get close, ~~he won't shoot~~*

Shino - *SysAdmin*
Shino the second head-developer on the team, manages the bot's servers, is in charge of managing the database, and will probably play a key role in the website development as well. Unfortunately, smart people are busy, so he's often occupied with other large projects. Check out Shino's Discord server here: https://discord.gg/ww

NateTheCarrot - *Developer / Big Brother*
Nate works on commands and other functionality of the bot and has been with the project since the very beginning. When something happens, Nate is most likely to be there to help resolve it. Don't get on his bad side, though, or you might get snapped like a carrot. ***insert shameless self-plug here***



CookieSlime - *Developer / Professional Slime Maker*
Just a cookie with some slime. He's a close friend of Bratatat in real life and is one of the sweet kind; always ready to help if needed. He's pretty new to coding but gets taught web development at school and has proven to be a dedicated learner. *Give him a hug*

Getting Started

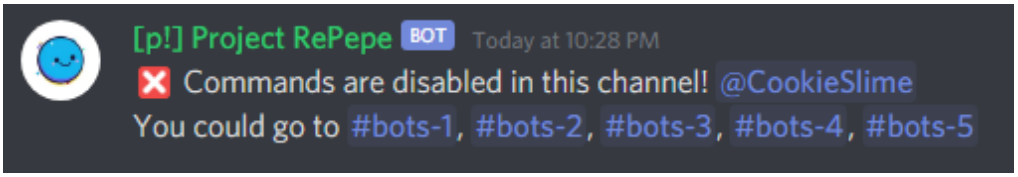
After inviting the bot to your server, you can get started by using `p!help` - that will list all commands you have access to in that channel.

Most of these commands are self-explanatory, but you should really give them a try yourself (we won't go more in-depth on all of them). We definitely recommend checking out all new challenges (`p!c`) to get yourself a boost in Pepos & learn more about the bot along the way!

For server owners

Here are a couple of things you probably want to do after inviting the bot:

- You can change the bot prefix with the `p!setprefix` command. To retrieve the prefix in your server at any point, just ping Pepe!
- Restrict command usage from a specific channel with `p!cmdchannel`. If you use `p!cmdchannel` twice, you will make a channel a command-specific channel - meaning that the bot will inform users to use that channel if you're using the bot in the wrong channel. Use the command a third time to just allow commands again.



- Set up a server roleshop with `p!role`
  - You can add roles for free, like an NSFW role or a role to get pinged for announcements, just by using `p!role add <name>` or `p!role add <name> <description>`
  - More special roles you could sell for Pepos, by using `p!role add <name> <price in Pepos> [description]`. By default, you as the server owner will receive 70% of that amount of Pepos when someone buys a role in your server. If you upgrade your server to Premium Status, you'll get 90%.
  - You can sort roles in your roleshop with `p!role sort`
- Change your server's settings with `p!guildsettings` (or `p!gs` in short)
- Create fun countingchannels in your server with `p!cc start` - happy counting!
- Use `p!attention` to get rid of any attention-seekers in your server (people that have a name starting with a special symbol to get higher on the member list) - by default, it'll just replace that symbol with a tilde (~) to put them at the bottom of the list, but you can just change their name to *Baby* by using `p!attention <new name>`.

Argument Parsing

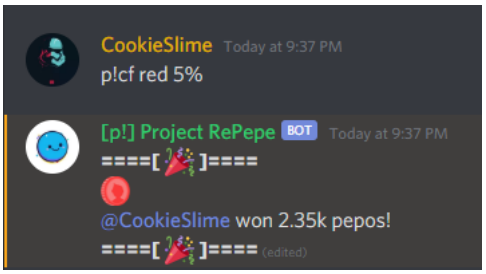
We don't care about the order, lol

```
p!pay @Bratatat 100
p!pay 100 @Bratatat
```

Often the order in which you type arguments no longer matters to the bot. Paying 100 Pepos to Bratatat or paying Bratatat to 100 Pepos? Who cares, right?

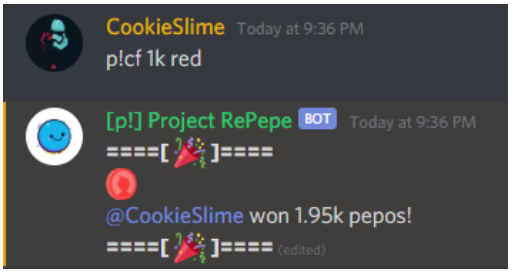
This even works if you were to type the user's ID instead of mentioning them. Sweet, right?

Easily gamble it all

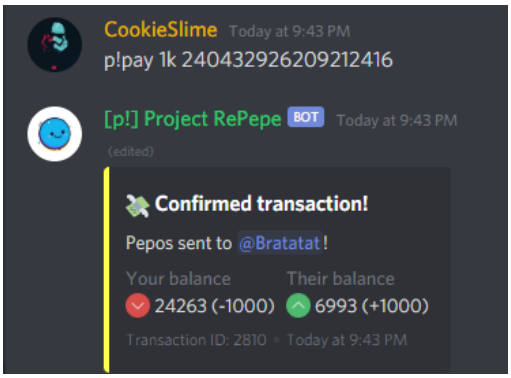


For commands that involve Pepos, you can simply type *third, half, all* or just type a % (like in the screenshot on the left) - to use an amount of Pepos relative to your own balance!

If you want to send large Pepos amounts, you can just type "xK" for an amount in the thousands, or if you're really rich: use "M" for ~~McNuggets~~ Millions!



Using users without actually pinging them, smh

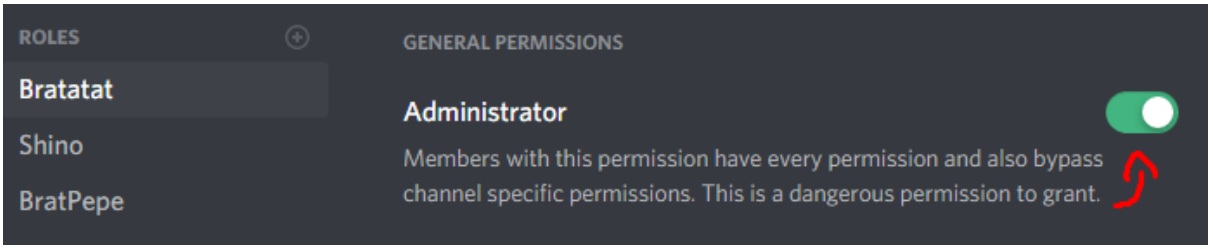


To not annoy your friends with pings all the time, you can use their IDs to send them Pepos or insult them, whichever you want!

This also applies to roles, but with roles, you can even just type the name of the role (Use quotations if it's multiple words) - or use the listing ID if it is listed in a role shop on the server.

Permissions

We plan on making it possible to change the required permissions for some commands in the future, but this is unfortunately not possible yet. For now, most commands are either available to everyone or restricted to server administrators. You can give a role “Server Administrator” rights in your server easily, but be careful with this!



Donate? ;) ;)

Thanks for considering a donation to Pepe Bot. By donating, you help us pay for the bot hosting (phew, those servers are expensive) & for all the coffees we developers need to consume to continue coding.
Please note that no purchase is necessary to make progress on the bot, and these donator-only features are only intended to help support the developers.

If you would like to make a donation, please message Bratatat#9999 on discord or hit us up in the bot's support server. We're still working hard on the bot to get a cool store up, so we'll have to process each donation manually

A positive side-effect of that is that every donator will receive a hug from us personally. Another positive side-effect of that is that because you're going through that extra hassle, we'll gladly give you a ***15% Discount on all purchases*** *right now - oi.*

Pepe Bot Nitro

Pepe Bot Nitro is like Nitro but much cooler, it is okay you will understand.

For just $7*, you unlock lifetime access to Pepe Bot features, like:

- A cool badge on your profile
- No fee when paying other users!
- No command cooldowns!
- Earn 1 Pepo every 90 seconds instead of every 120!
- Exclusive role
- *Free Premium Credit*

More features will be added in the near future, and all already existing Pepe Bot Nitro users will immediately get access to those for no extra money!

**The price of Nitro is likely to increase as more features get added o-o*

Premium Status

To unlock exclusive features server-wide, users can grant a server 'Premium Status' by paying Premium Credits they can get from *getting Pepe Bot Nitro, winning a giveaway or from buying them in the store.*

One Premium Credit costs $5 and with one credit you can extend a server's premium status by one month or activate it for a month. You don't have to be the server owner, you can make any server *Premium* if you want!

The current features include:

- Auto Attention | Automatically rename attention-seekers (*p!gs*)
- 10% Vendor Tax | 10% tax on selling roles instead of 30%
- Reduced cooldown | Server-wide 1s cooldown on commands instead of 2.5s
- Counting Milestones | A celebration and Pepos-reward every 100 counts to a random counter!

Pepos

Pepos can be used to buy a lot of things in the Pepe Bot Shop (*p!shop*)
You can get about 1000 per dollar spent, *but the more you get, the cheaper they get* OwO

Coming Soon...

Besides adding everything back from the old bot & handling all your suggestions - we'll also work on adding these things in the near future:

- Website - pepebot.xyz
    - Bot-related announcements and info
    - Browse sticker catalog
    - Online store
    - Quick and easy way to invite the bot
    - (Eventually) a dashboard for managing your Pepe Bot account and your servers
- Public API for all you developers out there
- Improved economy features - like exchanging from tatsumaki credits & vice versa

Suggest Features / Report Bugs

Please use the `p!suggest` and `p!bugreport` commands in the chat. You can even vote on suggestions in our support server!

We'll review each suggestion & bug report with care and you will be rewarded if your suggestion or bug report gets approved!

Got a burning question?

Again, here's a link to our support server: https://discord.gg/WW9U3nC

Thank you for your eternal support! We love you.
