Abstract
Purpose: Write in simple words the objective(s)/aim(s) of this study.
Research Methodology: Tell the place, name, brand, type of tools, methods, software, review, and survey that have been used to do the study/research.
Results: Write the main results or findings from the research.
Conclusions: Write the main conclusions from the research.
Limitations: State a brief limitation of the study.
Contributions: Please strengthen the contribution section by clearly identifying the new theoretical contribution of this study. Explain what theory, concept, or framework is developed from the findings and how it advances existing knowledge in the relevant field.

Keywords: *keyword 1, keyword 2, keyword 3, ... (min. 3 keywords, max. 5 keywords and sort keywords alphabetically)*

How to Cite: Author name. (Year). Title of study. *Name of Journal,* Volume (Issue), Numbe page.

Please note that *the abstract* should be:

- **In Times New Roman**
- **In 11 pt**
- **In one/single space**
- **In normal margin**
- **In justify paragraph format**
- **Between 180-250 words and without citations**

Please note that *the article* should be:

- **In Times New Roman font**
- **In one/single space**
- **In normal margin**
- **In justify paragraph format**
- **Between 5.000-10.000 words including abstract and references**
- **No more than 25% of plagiarism level (Turnitin)**
- **The journal must be written in English.**

Authors are permitted to check the level of plagiarism independently using Turnitin, provided that the Turnitin system is set to 'no repository' and the results are included or attached during the final revision of the article.

Format heading and subheading:
Heading 1 (Times New Roman, 12 pt, Bold)

Subheading 1 (Times New Roman, 11 pt, bold & italic)
Subheading 2 (Times New Roman, 11 pt, italic, no bold)
Subheading 3 (Times New Roman, 11 pt, normal)

1. Introduction

Provide a concise background of the study by clearly explaining the research problem, motivation, and significance. The authors should highlight the current state of the art through relevant recent literature, identify the research gap, and explain how the present study contributes to addressing the gap. All factual statements must be supported with in-text references following **APA style**.

2. Literature Review and Hypothesis/es Development

Related work of previous researchers should be presented. Minimum 25 good and at least in the last 10 years works should be presented. This section can be merged with the introduction section as well. Here, the author(s) can discuss the research gap that this study is going to cover. Provide in-text citation in APA style, e.g. According to Harris (2020), lorem ipsum dolor sit amet, consectetur adipiscing elit. Harris (2020) said that lorem ipsum dolor sit amet, consectetur adipiscing elit.
Lorem ipsum dolor sit amet, consectetur adipiscing elit. (Harris, 2001). For more detail guidelines of citation, please visit: https://aut.ac.nz.libguides.com/APA6th/intextcitation.

3. Methodology

Present the materials, methods, survey, questionnaire etc., used for the study. The author/s should explain whether this study is experimental, review study, simulation-based or survey-based. Discuss software and hardware used during the study with their brand names. Mention all research conditions, assumptions, and theories followed. This section should be easy enough for any reader to repeat the study under similar conditions.

4. Results and Discussions

Provide logical and scientific analysis of the study's findings—present pieces of evidence to support your analysis by citing the work of earlier researchers or existing theories.

*Table conditions. Use only horizontal-outside borders, the title of the table is in the left, times new roman, 11 pt, align left, normal (without bold and italic). The table is placed in the center. Give the source of the table under the table.

Table 1. Relationship between reliability and customer satisfaction

Predictor	**Unstd Coefficients** **Std. Error**	**Std Coefficients** **Beta(β)**	**T**	**Sig – value**
(Constant)	.767		11.575	.000
Reliability	.201	.693	14.844	.000

Table 1 shows....etc.

*Formula conditions. All formulas must be written in Equation format or appropriate mathematical symbols to ensure readability and consistency. Each formula in Equation format must be numbered on the right side of the formula in parentheses.

$$A = \pi r^2 \quad (1)$$

$$x = \frac{-b \pm \sqrt{b^2 - 4ac}}{2a} \quad (2)$$

Formula 1 shows....etc.

*Figure conditions. The figure is placed in the center. The title and the source of the figure are placed in the center.

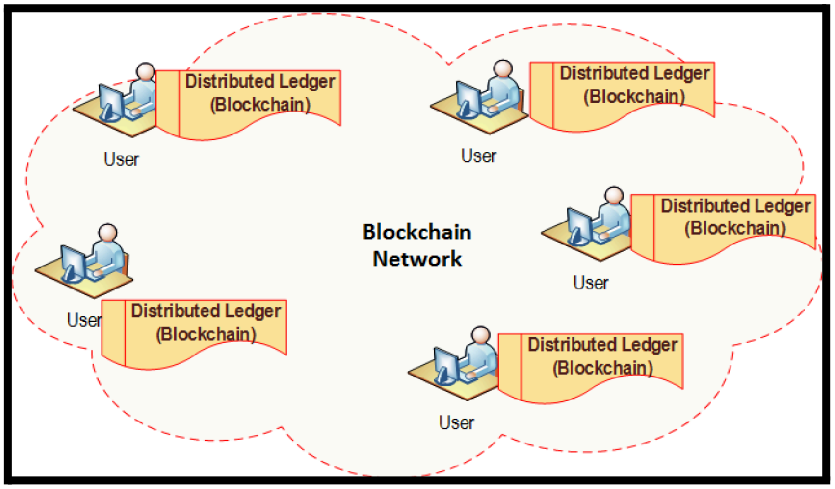

Figure 1. Blockchain distributed ledger technology

Figure 1 shows....etc.

5. Conclusions

Conclusion should consist of conclusions, suggestions, limitations and further studies.

5.1 Conclusion

Please revise the conclusion to directly answer the research objectives by summarizing the key findings and their significance. Avoid including limitations and future research directions in this section, as these should be presented separately. Ensure that the conclusion reflects the actual results of the study and highlights its contribution to the broader research field.

5.2 Research Limitations

Provide suggestions based on the study's results and limitations. These recommendations should focus on how to improve the topic of study or address issues that were not fully explored due to the study's limitations.

5.3 Suggestions and Directions for Future Research

This section provides suggestions for further research based on the findings of the study, such as expanding the sample, using new methods, or exploring factors that have not yet been studied. The goal is to deepen understanding of the topic discussed.

Acknowledgement

The author should present a list of acknowledgements at the end. Any financial or nonfinancial support for the study should be acknowledged.

Author Contributions

Authors must briefly state the specific roles and responsibilities of each contributor in the research process, such as conceptualization, study design, data collection, analysis, manuscript drafting, revision, supervision, and final approval. Author names should be written in abbreviated form (initials). This statement ensures transparency and clarifies individual accountability for the work.

References

It is recommended to use EndNote as a reference tool.

- All references must use APA 6th style and have an active Digital Object Identifier (DOI) link.
- Attach at least 30 references and 85% is in the last 10 years (must be article not books).

- References used must be sourced from 80% international journals.
- The references should be sorted in ascending order.
- For more detail guideline for referencing, please visit: https://aut.ac.nz.libguides.com/APA6th/referencelist
