Watch this Space Animation

DLO, term 2 task: Your task is to create an animation that introduces planet earth. Your animation should explain what earth is, how it relates to the moon and the sun, and its place in the solar system. You will get more marks for adding more detail. You can add any detail that you learn from your Inquiry and Literacy lessons. For example, you could show day and night, how the moon orbits around the earth or how far away the earth is from the other planets in the solar system.

	1 mark	2 marks	3 marks	4 marks	5 marks
Graphics (Images)	Images are unclear, hard to distinguish what they represent	Graphics have some clarity of shape and detail.	Graphics are clear, adequate detail. Easy to see what they are / represent	Graphics are clear, original, have good detail. Easy to see what they are / represent	Graphics are outstanding with extra detail that enhances presentation. Graphics are **original**
Animation (Transitions, Audio)	Animation does not run smoothly; no audio effects included **One aspect** of the Earth/ Solar system has been animated	Parts of the DLO are animated, but they may be incorrect; audio effects unclear **Two aspects** of the Earth/ Solar system have been animated	Animation runs smoothly and in the correct sequence. Uses transitions and/or audio effects **Three aspects** of the Earth/ Solar system have been animated	Animation runs smoothly and in correct sequence. Appropriate transitions and audio effects help direct audience to main message. **Four aspects** of the Earth/ Solar system have been animated	Animation runs smoothly, in correct sequence. Transitions and audio effects greatly enhance presentation **Five or more aspects** of the Earth/ Solar system have been animated
Voiceover (scientific explanation of the parts of the cell)	Minimal planning and recording of voiceover	Evidence of some planning (a basic script) and voiceover present	Voiceover is clear and aides the storytelling of animation, showing understanding of the system	Voiceover is clear, aides storytelling, showing understanding of the system. Defines some key words.	Voiceover is outstanding, enhancing the presentation with extra detail relating to the system. Key words are defined.
Task Description (your thoughts and reflections)	Task description has minimal explanation of what you have created.	Task description has some explanation of your thinking towards science research relating to DLO	Task description has a clear explanation of your thinking towards science research relating to DLO.	Task description has a clear explanation with extra details of your thinking towards science research relating to DLO.	Tasks description has an outstanding explanation with extra details of your thinking relating to your DLO.
