HERE I AM

```
E                      A                                      E
I am standing by the river, I will be standing here forever
                     B                            A
Though you're on the other side my face you still can see
              E                  D          E
Why won't you look at me, Here I am, Here I am

I am searching thru the canyon, it is your name that I am calling
Though you're so far away I know you hear my plea
Why won't you answer me, Here I am

            B
I am in the blood of your heart, the breath of your lung
A
Why do you run for cover,
                 B
You are from the dirt of the earth and the kiss of my mouth
A                       B
I have always been your lover,
 D          E
Here I am, Here I am

I am the promise never broken and my arms are ever open
In this harbor calm and still I will wait until
Until you come to me, Here I am
```
