About 922 Proxy

After the largest proxy service provider at the time, **911 S5**, unexpectedly announced its shutdown on July 28, 2022, due to a hacker attack, the **922 Proxy** service was launched on September 15, two months after 911 S5 ceased operations.

Compared to competitors like Pia Proxy or abcproxy, 922proxy has a significant advantage in the **cleanliness** of its IPs, which stand out more. However, the selection of high-quality IPs has also resulted in a smaller range of IPs compared to other proxy providers.

When purchasing **922proxy**, customers will receive a CDkey (Recharge Code) with a corresponding number of IPs. The number of IP connections is unlimited and will only be lost when the customer uses them. Each IP, once connected, lasts for an average of a few hours, up to a maximum of 24 hours depending on your luck.
