How did you link to the NSL material? - BV

So when we introduced the Picoh's to the students, first of all, we showed them the videos at the Near Space Launch, and just really showed them some of the things you can do with physical robot devices.

And it got them excited and got them motivated. It was really interesting to see how the Ohbot was programmed to act more like a human. And the way at was gathering data and all the different possibilities of things that we explore with the Picoh's

Student: 'When the robot was launched, he saw lots of clouds in his face. He could see everything below him because since it was so high, could everything at he could see that the clouds'
