INVESTIGATING GLOBAL PERSPECTIVES

Purpose

Consider how different nations might think differently about reducing emissions.

Process

Complete the table below by identifying the reasons and obstacles to reducing emissions faced by both developed and developing nations. You can use the infographic "Who Caused Climate Change?" to help.

	What do you think are the most compelling reasons for these countries to reduce emissions?	What do you think are the most significant obstacles for these countries to reducing emissions?
Developed nations *In general, these countries are wealthier and have higher cumulative and per capita emissions.*		
Developing nations *In general, these countries are less wealthy and have lower cumulative and per capita emissions.*
