`At Server side:`

Run the following commands in command prompt

cd student-crud-fullstack/server

npm install

copy .env.example .env

npm run dev

You will get server running on port number

At Client Side:

Run the following commands in command prompt

cd student-crud-fullstack/client

npm install

npm run dev

You will get

http://localhost:5173

Click this url and run the app that’s it.

Note: use 2 command prompts one for server and one for client to run the above commands
