What I notice with the other groups.

Rocket baita 2.0 Group: I notice that it went high but not that far.

The epic aliens group: I notice that Grace's group's rocket went really high but didn't go that far. It went high but then it took 10 - 15 seconds to come down but it did have a cool effect to come down. (slow motion effect)

New windsoar group : I notice that the rocket went

The Grasshoppers : I noticed that it did go high but it ended up doing a couple flips. We also went just over 50 psi with 1 and half cups of water.

The astronomical sloths group: I noticed that Diana's group's rocket went really far and really high too but we didn't do a countdown and we were all a bit confused.

The Demon slayers Group: I noticed that the rocket went not that far and not that high either it kind of went off track / to the side.

Amis Group: I notice that it went high, and it also 60 psi, and 3/4 of a cup.

Steady 1: I noticed that it went off to the side and the fin came off once it was launched. Otherwise it was an overall great launch.
