ABC Curriculum Editing Guidelines

Please provide your email if you would like to have editing access.

Proofread with Google Editing Tool

If you go through the google link, there's an editing tracker in the top right corner (the button looks like a pencil).

Edit in the EDITING mode instead of suggested mode. I'll be able to view all of your edits but I don't have to approve each one.

Questions
If you have a question, then you can make it in a comment and I'll see that and be able to give you feedback on the comment.

Vocabulary words
At the beginning of each lesson is a list of vocabulary words. We decided that we would list the vocabulary words starting with lowercase letters if they are common nouns.

Design
You don't need to do a lot of changes with design because at the end, we will need to make it all look uniform, but if you have suggestions or other pictures or information to add in, that would all be helpful.
