OFFERING

Build applications end to end (front-end and back-end) within the JavaScript ecosystem.

Collaborate with stakeholders from project definition to post-release optimizations.

Lead as a technical expert and driver of organisational change.

Act with an agile mindset and empathic, collaborative style.

EXPERIENCE

Software Engineer Web — *Trade Republic*

Since Mai 2023 in Berlin

I started in the Internal Tools department and collaboratively planned, designed, implemented, and enhanced:

- a tool enabling fair and comprehensive employee performance reviews ;

- a tool simplifying the planning and execution of hiring tasks from requisition to employee onboarding through deep integrations with Human Resources tools ;

- interactive progress tracking dashboards that contributed to better synchronization of all departments towards delivery roadmap.

I also led an initiative to simplify the processes involved in adjusting tools and permissions after each company structure change. This resulted in reduced access loss and shorter waiting times for teams.

Later, I joined the Cash Experience team where I built:

- AI-enhanced tools that contributed to faster and more accurate resolution of customer inquiries by support agents ;

- a customer-facing application enabling the management of patronages to the benefit of child accounts.

Tech stack: Vue, Node.js, TypeScript, PostgreSQL, Kubernetes, AWS...

Full Stack Web Developer — *Go-e Labs*

Sept. 2021 - Oct. 2022 in Berlin

I was responsible for the planning, development and rollout of the new website in over ten languages, with Content Management System (CMS) integration. This included:

EDUCATION

2017
M.A. European literatures
Humboldt University, Berlin

2011
B.A. French literature
University Lille 3

2006
Baccalaureate
Lycée Fénelon, Cambrai

LANGUAGES

English – advanced (C1)

German – proficient (C1+)

French – mother tongue

Last updated: Aug. 2025

- Communication with stakeholders, team synchronization, and support for other developers ;

- Creation of a Continuous Integration/Continuous Delivery (CI/CD) pipeline for efficient and timely delivery ;

- Search Engine Optimization and implementation of tracking tools for the marketing team ;

- Deployment on Google Cloud and Vercel platforms, including performance and reliability monitoring of the CMS servers ;

- Creation of a custom React component library with CMS integration enabling fast rollout of new marketing pages.

Tech stack: React, Next.js, Node.js, Strapi, TypeScript, Storybook, GraphQL...

Full Stack Developer — *Shop Apotheke*

Jul 2020 - Aug. 2021 in Berlin

- Refined, built and rolled out the frontend interface of the new "My Account" area, where customers can manage their personal data, subscriptions, orders, and communicate with customer support.

- Supported company growth by participating in the technical assessment of candidates and onboarding new joiners into the frontend project.

- Participated in a reflection group with the mission of shaping a state-of-the-art, modular, and resilient frontend architecture. The main achievement was the adoption of TypeScript.

Tech stack: React, Node.js, Storybook, Less, Webpack, CircleCI, Docker...

Full Stack Developer — *Diginex*

Oct. 2019 - June 2020 in Berlin

- Developed a web application for trading cryptocurrencies. The main achievement was a 30% improvement in the application's responsiveness.

- Created a web application for blockchain-secured document exchange.

Tech stack: React, Vue, Node, TypeScript, Styled components, websockets...

Front End Developer — *Neofonie*

Aug. 2018 - Aug 2019 in Berlin

- Migrated a multi-step ad-insertion form to a modern React app.

- Created, maintained, and optimized landing pages that consistently ranked in Google's top 10 results.

- Migrated a PDF generation service to a modern tech stack.

Tech stack: React, Node.js, Less, Jest, microservices, GitLab, Jenkins
