Lapse Photography
For SED 618

For this assignment, you will need to have two seperate 30 second lapse photography projects. So depending on how often your photos or videos will take will make a difference on the length of your finished product. So please make sure you calculate at least 30 seconds for each of the completed projects.

There are a number of different ways you can complete a lapse photography or lapse video. You can accomplish this on your phone picture, phone video, GoPro, Ipad, etc. If your device doesn't have a feature of lapse photography, there are a number of apps that will allow you to create lapse photography. Once you are finished, please embed the finished results onto your lapse photography webpage.

Both of your lapse photography projects need to have some type of text at the beginning of your project

Video on how to place your lapse photography that is on youtube onto your website.

The app that he talks about is Lapse it and it can be found in the app store. I used it in the past and it is free and works. There are other video tutorials and lapse app, so feel free to look around.
