Storytelling With Purpose

My new book helps us solve existential challenges to teaching and learning: low student engagement and artificial intelligence. This book is a guide that helps learning coaches, teachers, and administrators reframe teaching and learning through the authentic, student-centered experience of creating digital stories that leverage curiosity and passion as the engine for learning. Find out more.

Change the Narrative podcast

In this travelog style podcast, I explore innovation in education and the workplace. We hear from some of the best innovators across disciplines to hear their ideas about how you can change the narrative of your life and workspace

Creating Digital Books on Mac & iPad

Publishing digital books can seem daunting, so I co-authored this digital book with Apple to walk you through the steps of creating digital books using Pages. See step-by-step instructions and best practices, including design tips, advanced image editing, adding multimedia, using text, organizing with tables of content, and how to publish to Apple Books. See teacher-created books, and hear testimonials about how to use digital books made with Pages in all subject areas and grade levels.

Build Empathy Through Storytelling

I'm passionate about all kinds of storytelling and how the act of creating and publishing stories has the ability to open hearts and minds. This article explores my ideas about storytelling and empathy and can give you a better sense of my philosophy of teaching and learning. It was written by Nicole Krueger for the ISTE member magazine, *Empowered Learner* in 2018.

Digital Storytelling Teacher Training Trips

Attend these teacher-only trips to locations like Guatemala,Cuba and Vietnam to learn how to create multimedia stories. While you learn by doing, you'll also receive curriculum you can use with your students back at home. See what this trip looks like by downloading the free Human Geography ebook below! Find out more and register.

Human Geography Project

This free digital book documents the projects created by teachers on a teacher training trip to Guatemala, where the participants learned how to create video documentaries using their ipads. This digital book contains their final projects, the process they used, personal reflections about how they'll use these skills in their classrooms, and the recipe for replicating this project in your classroom.

Check out a lesson plan for this project that I published on the Adobe Education Exchange.

Everyone Can Create

This set of free resources created by Apple provide how-to instructions for integrating creativity in the classroom.
