Universal Rotor Dashboard

Entity	Open Source Ecology
Project Name	Universal Rotor
Version	Prototype 2 (v13.8)
Completion Status	Prototype Stage
Version Date	8/2013
Terms of Use	GPL / CC-BY-SA
Summary	A tractor-mounted or stand-alone rotor that can be fitted with a wide array of toolheads.
Keywords	Microhouse, Natural Building, Ecohouse
Description	The universal rotor allows for many different machines to be built around the core of a universal rotating element. Because so many different machines can be built around this rotor, the rotor constitutes a Universal Rotor Construction Set.
Predecessors	Prototype 1
