Belarusian search crafting

Clarifications:
"/" in this document means separation between alternative search crafts
+sj means "some junk" (not a lot usually)
+j means just junk (most likely 2+ pages, but still could be useful)

I'm not really good at organizing things, but I've collected multiple possible search crafts for different items, find what's most comfortable for you to use, I might edit this doc from time to time
Edit: I'll highlight (using bold) which search crafts I currently use or which are the most effective in my opinion
