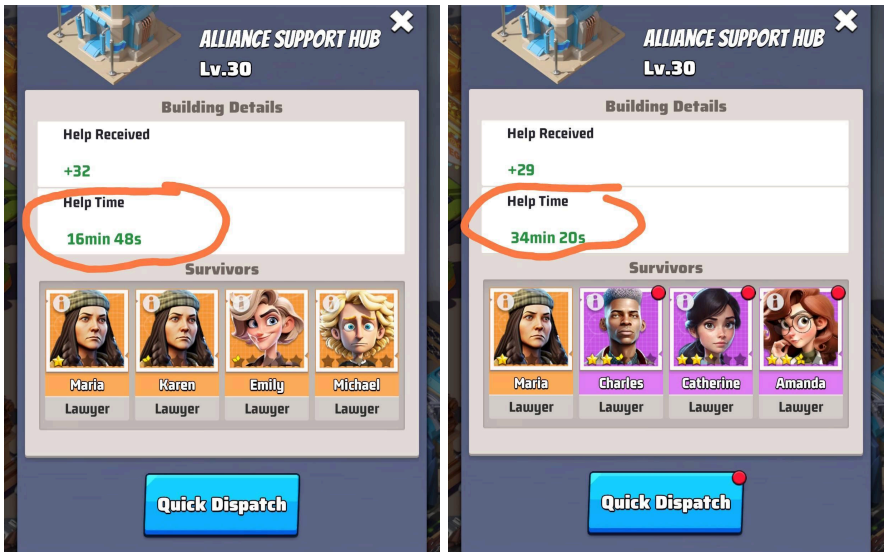
🥷Survivors Tips

🪄Here's a magic trick to receive more help time from your survivors.

▪ You may think that having gold survivors in your Alliance Support Hub is the best option because... Well, anything that's gold is better. BUT! Faced tokens for gold survivors are harder to obtain, which means it'll take a while to upgrade them to one star, two stars, etc.

✨Having purple survivors with stars is the trick that will give you more help time.

Let's look at this example:



▪ At the first screenshot, we have gold survivors — only one of them has one star. Help time is 16 minutes and help received is +32. Those are the survivors the game recommended when I clicked Quick Dispatch.

▪ On the second screenshot, we have one gold survivor with one star and three purple ones with two stars. Help time is 34 minutes and help received is +29. Those are the survivors I manually selected.

▪ Help received is less with the purple survivors, BUT help time is double! And that's exactly what we want to have more time reduction.

❗Note that help time is more beneficial, especially for shorter tasks, but help received is better for longer tasks.

💡Tips about Survivors and Tokens:

🔸 To fully upgrade a survivor to 5 stars, you will need a total of 585 Survivor Shards. As you progress, the increasing shard costs make it important to plan your resource management wisely, ensuring that you have enough shards and tokens for each level.

🔸 Due to the rarity of Survivor Tickets compared to Hero Tickets, and the need to collect duplicate survivors for upgrades, it’s essential to take a strategic approach to upgrading your survivors. Carefully select the survivors you want to focus on based on their abilities and how they fit into your overall team strategy. Don’t try to upgrade every survivor at once — focus on those who will provide the greatest benefit and enhance your growth in the game.

🔸 Only upgrade survivors that are dispatched. Don't waste your tokens. It's advised to spend them on survivors like Lawyers, Scientists, Instructors, Officers, and Nurses. Anything else is secondary.

❗ Pro tip: Move your best survivors between tech centers before starting research — survivors only need to be assigned to a tech center when research starts for their bonuses to apply. You can do the same with your survivors in barracks for faster training.
