Harry Mellor – The Peoples Emergency Briefing

President Steph thanks Harry Mellor

At the Club's Thursday meeting we had an interesting and thought-provoking documentary called the **Peoples Emergency Briefing**. This is a video presented by Chris Packam joined by some well-known actors and members of the public, who watched a number of specialist speakers, all experts in their particular fields dealing with the environment and the effect that the current increase in pollutants are having on the world we live in. Each speaker outlined their concerns as to the future of the world.

The **People's Emergency Briefing** is a UK-wide public awareness campaign and 50-minute film project organized by the National Emergency Briefing (NEB). In November 2025, the National Emergency Briefing brought together leading experts to present the latest evidence on the climate and nature crisis to politicians and other influential people in Westminster. That evidence is now on the public record.

The aim of the film is to bring together people in local communities across the UK to hear the evidence and discuss how to respond - together with their MP.

- **The Film:** Presented by naturalist and broadcaster **Chris Packham**, the 50-minute film features nine independent experts outlining urgent threats from the climate and nature crisis to food security, public health, the economy, and national security.
- **Core Demand:** Organizers and supporters are calling on the UK government to stage a live, prime-time televised emergency briefing introduced by the Prime Minister and delivered by independent scientists.

The intention is to get the documentary to be screened to as many people as possible to give a clear indication of the problem we are faced with on a global basis. It may not be too late, but from the documentary it is clear that action is required and soon.

The screening was followed by a Q&A session with Harry Mellor the Chair - Climate Action-West Northamptonshire - https://ca-wn.org/ taking questions.

So if you missed it is strongly suggested that you find a screening near you.
