🏞️Season 4 Preparation Guide

Hello all. In this guide, we'll look at the things we can do to prepare for Season 4 to have a better experience and progress faster. Let's start!

✨Pre-Season Preparation (General)

1. Save Hero Return Tickets

It is recommended to save hero return tickets — these often convert into valuable seasonal resources once the new season begins. I had personally saved around 300 tickets for Season 3, but I didn't see any difference in the long run. For the first few days, it was a great boost. So it's up to you.

2. Stockpile Purple Shards

Season 4 promotes the SSR hero Sarah to UR. Having enough shards ready to unlock and upgrade that hero quickly gives a big advantage.

3. Gather Stamina

Players recommend saving a LOT of stamina going into Season 4 — at least 10,000+ or as much as you can. You'll spend it on the early world map objectives and seasonal events.

- Some players say Season 4 isn't as stamina-intensive as greenification in Season 3, but more is still better.

4. Stack Speed-Ups & Diamonds

Having built-time speed-ups and diamonds ready helps rush seasonal building upgrades in the first few days — a crucial advantage.

5. Stockpile Shields and Teleporters

During Copper wars, we'll have to use shields to be protected from the Mummy skill. Start buying all the shields you can from now.

Also, we'll need to move around a lot during stronghold and city captures. Make sure you have plenty of teleporters.

6. Troops!

Remember that troops are very important during season. We'll burn a lot from doom elite and zombie first-kills. Your drill grounds must be full when entering the season.

🗝️ Game Mechanics to Prioritize Early

5. Focus on Seasonal Buildings & Resource Tech

Season 4 has new or rebalanced seasonal mechanics (Quartz Workshops, Optoelectronic Lab, etc.).

- Upgrade seasonal labs/buildings early.
- Alliance tech that lowers construction costs or increases build speed is highly valuable.

6. Doom Elites & First-Kill Rewards

Unlike Season 3 where doom elites could be extremely stamina-heavy at the start, in Season 4 the rewards are still important but not as brutal. Players report the season requires less stamina overall than greenification.

🤝 Alliance Coordination

7. Prep Alliance Tech & Positioning

Make sure high-level alliance tech (construction/cost reduction) will be ready at the season reset — this gives the team a faster start.

Coordinate alliance land capture strategies so you can contest cities and strongholds efficiently when the season opens.

8. Rally Strategies for Doom Events

Low resistance allies can start rallies — higher resistance members join to help kill Doom Elites for first-kill rewards. This still applies in Season 4.

🎯Summary — Pre-Season Checklist

- Save stamina
- Stockpile Hero Return Tickets & purple shards
- Gather speed-ups and diamonds
- Coordinate alliance tech & resistance levels
- Plan to quickly hit seasonal objectives (doom walkers, strongholds, labs)
