**ABSTRACT**

*Zakat is a portion of the property that must be issued by every Muslim if it has reached the conditions set. The number of National Amil Zakat Institutions (LAZNAS) officially recorded in the National Amil Zakat Agency (BAZNAS) is 35 Institutions. Meanwhile, the provincial-scale amil zakat institution is 28 LAZ and there are 3 LAZ provincial scale amoung of them have been officially recorded in BAZNAS. Sharia compliance is one of the important things in the realization of good sharia governance. Sharia compliance illustrates the principles of sharia that must exist in the management of zakat. The purpose of this study is to find out the application of Sharia compliance to zakat management organizations in Surakarta based on Law No.23 of 2011 and sharia compliance index according to BAZNAS 2020. The subjects of this study are three zakat management organizations in Surakarta, namely Amil Zakat Institute (LAZ) Solo Peduli Ummat, LAZ Nurul Hayat, LAZ Yatim Mandiri. In data collection, researchers use interview techniques, and documentation. The results of the study found that zakat management organizations in Surakarta have implemented sharia compliance based on Law No.23 of 2011 and sharia compliance index according to BAZNAS. Based on the calculation of sharia compliance index LAZ Solo Peduli Ummat reached a value of 0.8295 and LAZ Nurul Hayat is 0.829274 with an excellent category. Meanwhile, LAZ Yatim Mandiri reached 0.808834 with a good category. The calculation is obtained based on the dimensions of management, zakat collection, zakat distribution, and zakat regulation.*

***Keywords** : Compliance Index, Shariah Compliance, Zakat*

## I. INTRODUCTION (Heading 1) (font 11, Space 1.15 with 6 pt after)

This chapter describes the problem and background or the motivation of the study; the research gap; objective; and the organization of the study. Motivations should be supported by references and/or data from its authoritative sources.

This chapter describes the problem and background or the motivation of the study; the research gap; objective; and the organization of the study. Motivations should be supported by references and/or data from its authoritative sources.

This chapter describes the problem and background or the motivation of the study; the research gap; objective; and the organization of the study. Motivations should be supported by references and/or data from its authoritative sources.

## II. LITERATURE REVIEW

This chapter outlines the theoretical foundation of the study, drawing on original research articles and authoritative international textbooks, along with relevant, comprehensive, and up-to-date prior studies. It also summarizes previous findings, highlighting areas of consensus, established knowledge, and issues that remain unresolved.

Figures and tables should be numbered consecutively in the order in which they appear in the manuscript. Each figure and table must include a sequential label (e.g., Figure 1, Figure 2; Table 1, Table 2, etc.). A sample table format is provided for reference below.

**Table 1.** (Times New Roman, font 10, 1.15 space)
**Page Setup and Fonts**

| Chapters | Font Size | Pt Afte | Font Style | Font Type |
|---|---|---|---|---|
| Article title | 12 pt | 0 | | Times New Roman |
| Abstract title | 11 pt | 6 | Bold | Times New Roman |
| Abstract body text | 11 pt | 6 | | Times New Roman |
| Keywords | 11 pt | 0 | Bold | Times New Roman |
| Heading 1 | 11 pt | 6 | Bold | Times New Roman |
| Heading 2 (subsection headings) | 11 pt | 0 | Bold | Times New Roman |
| Heading 3 (sub-subsection headings) | 11 pt | 0 | Bold | Times New Roman |
| Body text | 11 pt | 0 | | Times New Roman |
| Last Paragraph of body text | 11 pt | 6 | | Times New Roman |
| Table/Figure caption | 10 pt | 0 | | Times New Roman |
| Table/Figure title | 10 pt | 6 | | Times New Roman |
| Table/Figure content | 10 pt | 0 | | Times New Roman |

## III. METHODOLOGY

The methodology section should describe the data, model development, and methods employed, along with the scientific rationale for their selection. Papers may be either quantitative or qualitative. For quantitative studies, simple and nonessential equations may be written within the text (e.g., $a = b/c$), while important equations should be displayed on a separate line. Principal equations must be numbered consecutively, with the number placed in parentheses and right-aligned.

Authors are strongly advised to use MS Word Equation Editor or MathType when preparing both inline and display equations. Equations form part of the sentence and should therefore include appropriate punctuation. To apply the correct formatting, select the 'Equation' style, which sets the tab stop position. Press the tab key once to position the equation and once more to insert the equation number on the right.

## IV. RESULTS AND DISCUSSION

This chapter presents all research findings using tables, graphs, and other visual aids, accompanied by detailed descriptions. It includes one or more robustness tests to confirm the reliability and significance of the results. Furthermore, it provides a critical discussion of the findings, highlights the novelty of the study, offers justifications for the results, and compares them with related studies to identify similarities or differences.

## V. CONCLUSION AND RECOMMENDATION

This chapter provides an explanation of the research findings in relation to the stated research questions. It may also include additional findings, if any, along with practical and feasible recommendations for practitioners and regulators, as well as suggestions for future research based on the study's limitations.

## REFERENCES

The References section lists books, articles, and reports that are cited in the paper. Reference styles used American Psycological Association (APA) using *Mendeley or other standard reference software*.
