Privacy Policy

This privacy policy applies to the Bulgarian Recipes app (hereby referred to as "Application") for mobile devices that was created by Radoslav Matev (hereby referred to as "Service Provider") as a Free service. This service is intended for use "AS IS".

In short: the Application does not collect, transmit or share any personal information. It works entirely offline, requests no permissions, and contains no advertising, analytics or tracking.

Information Collection and Use

The Application does not collect any personal information. It does not require an account and does not ask you to provide any information about yourself.

- The Application does not request any Android permissions, including access to the internet. All recipes and photos are included in the Application itself, so it does not send or receive any data over the network.
- The Application does not access your location, contacts, camera, microphone, photos or other files.
- The Application does not use analytics, advertising, crash reporting or any other tracking.

Earlier versions of the Application used Google Firebase online services (Authentication, Realtime Database and Storage) to load the recipes and photos. The current version no longer uses Firebase or any other online service.

Data Stored on Your Device

To remember your preferences, the Application stores only the following data, locally on your device:

- your list of favorite recipes;
- the text size you have chosen for recipes, and whether the help message has already been shown;
- the language you have selected in the Application (Bulgarian or English).

This data is never sent anywhere by the Application, and the Service Provider has no access to it. It is protected by the Android app sandbox, so other apps cannot read it.

Device Backup

If backup is turned on in your device settings, Android may include the data described above in your device backup (for example, in your Google account), so that your favorites are restored on a new device. This backup is performed by Android and Google according to

your device settings and Google's Privacy Policy, not by the Application, and the Service Provider has no access to it.

Third-Party Services

The Application does not include any third-party services, SDKs, analytics or advertising libraries. The Application is distributed through Google Play; Google may collect information related to downloading and installing apps, as described in Google's Privacy Policy.

External Links

The About screen of the Application contains a link to the License Agreement, which opens in your web browser. Once you leave the Application, the privacy policy of the website you visit applies.

Data Retention and Deletion

The Service Provider does not collect or retain any of your data. You can delete all data stored by the Application at any time by clearing the Application's data in your device settings or by uninstalling the Application.

Children

The Application does not collect personal information from anyone, including children under the age of 13.

Security

Because the Application does not collect or transmit any personal information, no personal information is held by the Service Provider. The data stored on your device is kept private to the Application by Android.

Changes

This Privacy Policy may be updated from time to time for any reason. The Service Provider will notify you of any changes to the Privacy Policy by updating this page with the new Privacy Policy. You are advised to consult this Privacy Policy regularly for any changes, as continued use is deemed approval of all changes.

This privacy policy is effective as of 2026-09-24.

Your Consent

By using the Application, you agree to this Privacy Policy.

Contact Us

If you have any questions regarding privacy while using the Application, please contact the Service Provider via email at raze79@gmail.com.
