PROJECT:REINTEGRATION

Dr. Anne Weaver
(Project Supervisor)

Played by actress **Christine Adams**

Dr Anne Weaver is a noted particle physicist and biologist, **SHIELD** academy professor, and a board member of the **Special Counsel to the SHIELD Director**. In addition to overseeing and supervising the **Project:Reintegration** program, her office also processes and contains any and all unstable and potentially dangerous items that are acquired by the team while on their assignments. **Dr Weaver** was very instrumental in designing and constructing the acoustic-kinetic harness that allows **Melissa Gold** to better control her sound-energy constructs.

LIFE & CAREER

- ★ Born to **Christopher** and **Latrice Weaver** on **February 28th, 1974** in **London, UK**
- ★ Earned a **M.Sc** degree in **Theoretical and Mathematical Physics - 1st Class Honours** on **May 3rd, 1990** (at age **16**) from the **Imperial College of London** in **London, UK** with
 - Awarded the **Abdus Salam Undergraduate Prize** in recognition of academic excellence as an **M.Sci** graduate in **Physics**.
- ★ Earned a **Ph.D** in **Particle Physics** from the **University of Oxford** in **Oxford, UK** on **July 15th, 1993**
- ★ Began working for the **UK**-based company **Benson Energy Labs** in **November** of **1993**, focusing on projects related to renewable energy technology and smart grid technologies
- ★ Earned a **Ph.D** in **Condensed Matter Physics** from the **University of Oxford** in **Oxford, UK** on **September 29th, 1996**
- ★ On **February 10th, 1997**, a 22 year old **Weaver** came to the attention of **SHIELD** when she attempted to board a flight from the **UK** to the **US** with a device of her own design that airport security officials believed to be an explosive or weapon
 - **SHIELD Agent** and scientist **Carolina Washington** was called in to assist local officials with the situation and determine how dangerous the device actually was.
 - **Weaver** explained to **Agent Washington** that she wished to attend a **NATO Summit** being held in **Washington, DC** in order to explain to a noted anti-landmine advocate about the possible applications of her invention- a device that generated stable, kinetic energy absorbing force fields (which, up until that point, had only manifested as small iridescent “bubbles” that her girlfriend **Shara** called “**Speedballs**”). **Weaver** then produced video evidence of these “speedballs” absorbing the impact energy of various firearms without moving a single millimeter or causing impact damage to the discharged shells. Unfortunately, **Weaver** explained, the energy was not destroyed, but was instead amplified, and would release with even greater force if a previously used force field ever came into contact with another surface.
- ★ On the recommendation of **Agent Carolina Washington**, **Weaver** was admitted to the **SHIELD Academy of Science and Technology** on **February 28th, 1997** to continue working on her invention and to study advanced courses in **Biophysics** and **Mechanical Engineering** - graduating from the academy with honours in **May** of **2001**
- ★ Became a professor at the **SHIELD Academy of Science and Technology** in **August** of **2001**

LIFE & CAREER

- ★ Became **Head of the Academy** at the **SHIELD Academy of Science and Technology** on **January 3rd, 2009**. Shortly after taking the position, **Dr Weaver** voluntarily had her kinetic force field generator sent to **The Fridge** storage facility after her research revealed that the machine could also generate dark force fields that actively attached themselves to energy sources in order to drain any and all remnants of energy from them.
 - During the discovery of the energy draining force fields, **Shara** - whom **Dr Weaver** had become engaged to - was paralyzed from the waist down after she came into contact with one of the energy draining orbs.
- ★ Led efforts to defend the **SHIELD Academy of Science and Technology** against insurgents and covert operatives during the worldwide **HYDRA uprising** and subsequent armed conflict that would later be called the "**Battle at the SHIELD Academy**" of **April 4th, 2014**
 - Killed an enhanced **HYDRA** operative - later identified as a disabled former firefighter named **Mitchell Tanner** - when he and other **HYDRA** agents attacked the academy
- ★ Began working with **Commander Robert Gonzales** and his **SHIELD** splinter group in late **April of 2014** in an effort to continue the peacekeeping efforts of **SHIELD** after it had been publicly disbanded.
 - While based on the **Iliad** aircraft carrier, **Dr Weaver** (along with her friend and mentor **Carolina Washington**) began the dispiriting task of personally delivering death notifications to the families of the **SHIELD** cadets, professors, and agents who lost their lives during the "**Battle at the SHIELD Academy**"
 - While going over a list of items stolen during **HYDRA's** raid of **The Fridge**, **Dr Weaver** discovered that her kinetic force field generator was one of the items stolen by **John Garrett** and his team
- ★ Took part in **Robert Gonzales'** attack on the **SHIELD** facility known as **The Playground** on **April 19th 2015** in an effort to prevent the continued actions of **Phil Coulson** and his **SHIELD** splinter group as well as secure the item known as **The Toolbox**.
 - On **April 27th, 2015** both the **Gonzales-led SHIELD** faction and the **Coulson-led SHIELD** faction agreed to work as one unified peacekeeping force, and **Dr Weaver** was assigned as a **Special Counsel to the SHIELD Director**
- ★ Was present when a **Inhuman** terrorist group, led by **Jiaying Tan-Zabo**, hijacked the **Iliad** aircraft carrier in an effort to spread **Terrigen Mist** from synthetic **Terrigen Crystals** all across the globe.
 - In the aftermath of the hijacking and retaking of the **Iliad**, a stash of synthetic **Terrigen Crystals** dissolved into the ocean and contaminated many of the organisms in the surrounding ecosystem, leading to the **Inhuman Outbreak of 2015**
