DATE	LOC	DIV	INJURY	DESCRIPTION	REC / FIRST AID
2/10	BG	PLUMBING	Bruised Left Hand	The employee was carrying a 6' ladder to his work area on the roof in icy conditions. When he stopped at his work area he slipped and fell with the ladder landing on his hand and his body on the ladder causing a contusion (bruise) and swelling in his left hand.	FIRST AID ONSITE MEDICAL CALLED
2/12	BG	MATERIAL HANDLING	Sore Ankle	The employee was walking on a sidewalk with a drop off and got too close to the edge, rolling his ankle.	FIRST AID NO ONSITE MEDICAL CALLED

7/22	BG	HVAC	Strained Arm	The employee was pulling ductwork apart and felt pain in bicep that caused numbness, loss of strength and grip control. This was temporary and was fine the next day.	**FIRST AID NO ONSITE MEDICAL CALLED**
8/12	BG	PIPEFITTER	Eye Injury	The employee was chipping slag by hand and a piece popped off and hit him in his inner eye on the edge of his eyelid. His eye was swollen and irritated. Received first aid care from eye dr.	**FIRST AID NO ONSITE MEDICAL CALLED**
8/18	BG	FAB	Cut Finger	The employee was using a bench grinder to remove the burr from the outer edge of 1" lengths of 1-¼" pipe. While doing so the pipe caught his glove and pulled his left index finger into the grinder hitting the grinding wheel and receiving a cut..	**FIRST AID ONSITE MEDICAL CALLED**
9/3	BG	HVAC	Strained Bicep	The employee was lifting ductwork to try and release gripple to begin disassembly. While holding ductwork and reaching for gripple he felt a pop in his bicep and instant pain.	**FIRST AID NO ONSITE MEDICAL CALLED**
9/23	BG	PLUMBING	Cut Finger	The employee completed swapping out shower valve plugs. He was scraping off old caulking/ silicone to reinstall the plate that was removed with his glove removed as it was wet and the plate was sliding around. I was using a dewalt scraper that he had purchased to help make it safer. While scraping the razor caught the metal and when it released he cut his opposite hand that was securing the plate to ground to scrape. His finger started to bleed a lot even with constant pressure he wasn't able to get it to stop. Onsite Health & Safety was called to assess the cut. The wound was cleaned and steri-strips were applied then wrapped with gauze. The employee went back to work after treatment.	**FIRST AID / ONSITE MEDICAL CALLED**
10/1	TC	PLUMBING	Strained wrist & shoulder	The employee was operating a core driller when the bit got stuck and the drill spun while he was holding it. Straining his wrist & shoulder.	**FIRST AID NO ONSITE MEDICAL CALLED**
10/20	BG	PLUMBING	Punctured Foot	The employee was removing wood bracing from water heaters to move them into the mechanical room. After moving the first water heater the crew moved back to the work area to remove the wood bracing on the second water heater and the employee stepped backwards and stepped onto a piece of wood with a nail sticking out. The small puncture was cleaned, antibiotic applied and bandaged. He returned to work.	**FIRST AID NO ONSITE MEDICAL CALLED**
