

Strategy creation

LEVEL 1 - Defining Objectives

- Riding Trends - Momentum trader

I am a kind of strongly opinionated person that is confident in my decisions. Also I could ride a trade as long as it's going where I predicted.

- Time availability - Intraday Trader

I am 18. I got a gap year. Thus I have plenty of time to sit in front of a screen. Usually I spend 12 hours a day in front of the computer.

- Risk Profile - Risk Averse

I don't like losing. Also I have limited income flow. I can do a part time job but I would prepare to gain trading experience. Thus I would choose to grow slowly.

- Asset Class -Stock Underlying

In my opinion, trading stock underlying suits best in my current situation.

Thanks for all your help!
