Theoreticly its way cheaper to buy cr/gr/kyrios gear (Anthalon) gear to infuse it into erenor til celestial since you get more exp

	GOLD	EXP	EXP/Gold Ratio
CR	20	263	13,15
GR	20	263	13,15
Kyrios	150	1865	12,43333333

We will use Overfeed with Kyrios since they have by far the best gold/labour to get to celestial

EXP Needed	Overfeed exp	Kyrios Gear Pieces?	estimated cost	Gold Saved%	Gold Saved
33952	11190	25,07888889	3750	880,48%	29267,95

Side Info Worse Case Scenario with no Bonus
Leader Infusion was good exp when they were like 30g each

Now its not worth it to make up to Divine Kyrios Gear

Arcane to Celestial	Divine - Epic
3750	now roughly 20k
Celestial - Divine	
roughly 5k gold	

Important - Fuse the Synth 1 by 1 to not accidently overfeed - you save a lot of gold if you get Bonus EXP
