

Current Cover

Reference

I would like a new cover photo for my book. The old one appeared made by AI and some readers expressed that this made look cheap. I'm interested in a high fidelity, stylized, redesign that is dripping with neon colors and includes the new title.

In the foreground I would like a light skinned Black woman, with curly hair, looking at a computer screen. In the background I would like a row of neon arcade machines that cast neon glows all around the image. From the computer, a glow should appear on the woman's face. Lots of glow. The border should turn into a vibrant neon pink that I can use as the color of the spine and back cover of the book. The back cover can have very subtle muted design or maybe just be that one color, it's really the front that matters.

MATTHEW VENTURES

Vibe Reference

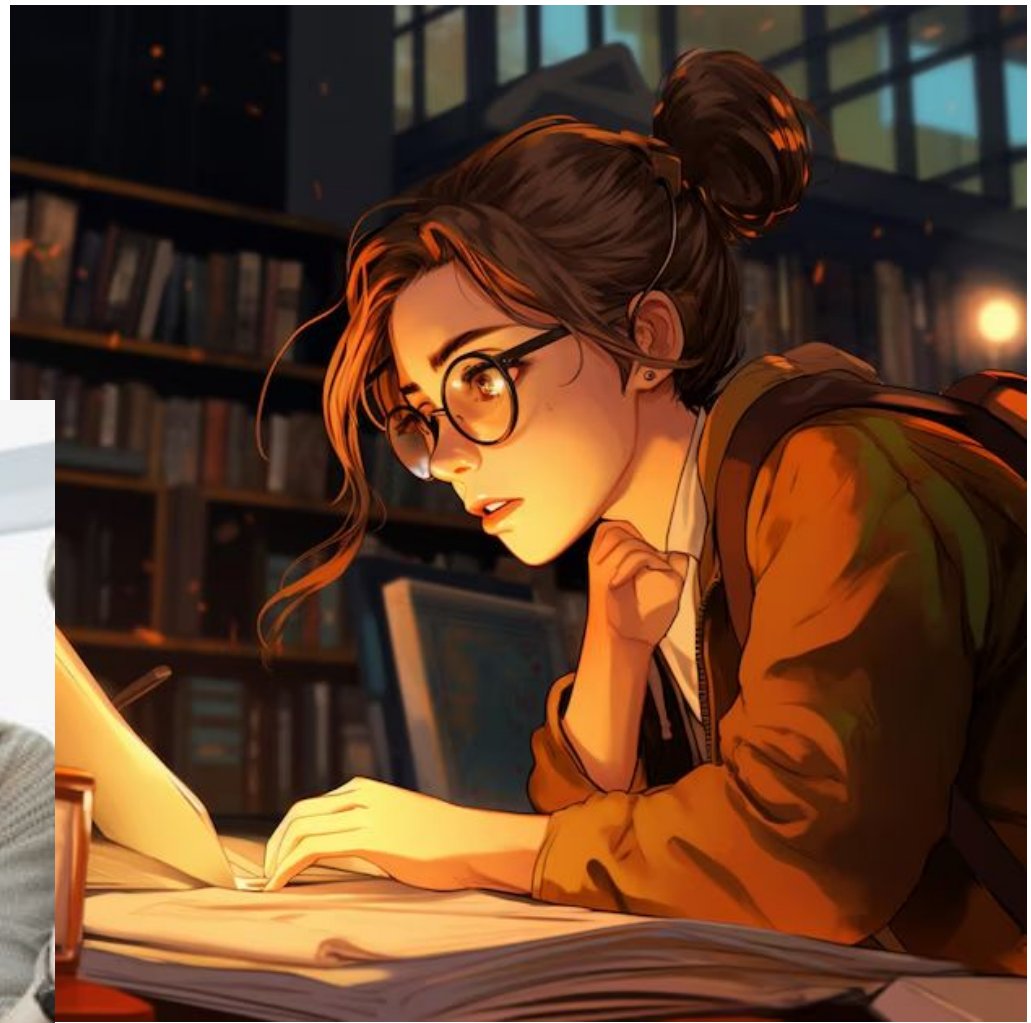

Face Glow Reference

Character Mood Reference

The model should look engaged (leaning in). And in the state of discovery (mouth slightly ajar, but smiling).

Title

Get Into Game Dev Programming

Cheat Codes for Technical Interviews

This is the new title that should be at the top of the book.

Model Reference

I like this model's face shape. It's very round and friendly. But she's too White. I want a light-skinned Black woman with Black curly hair.

----->

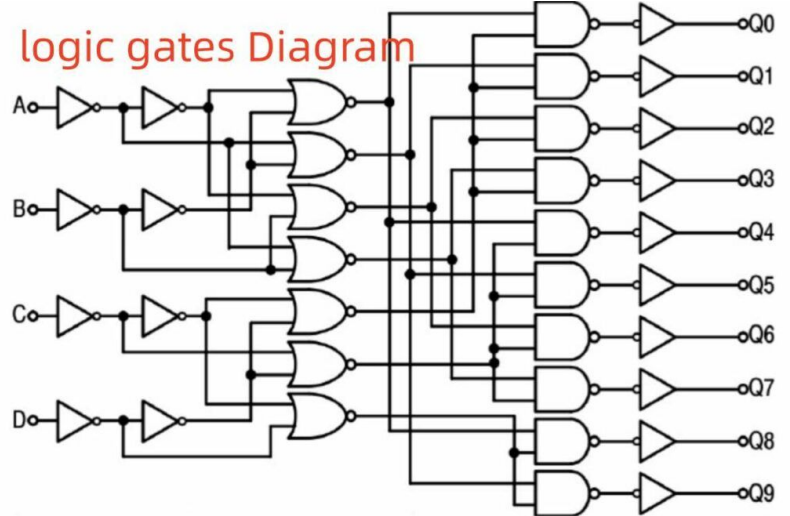

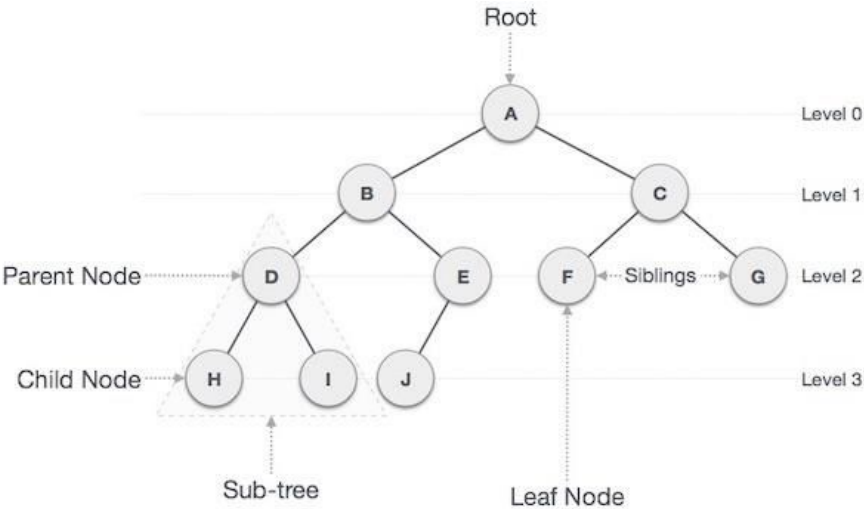

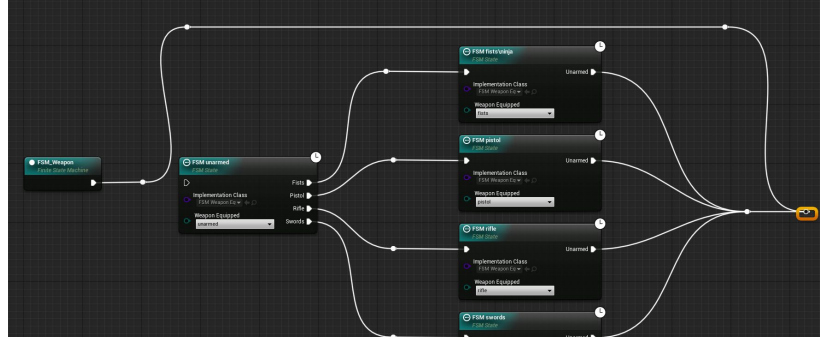

Here's the skin color I want:

Easter Egg Reference

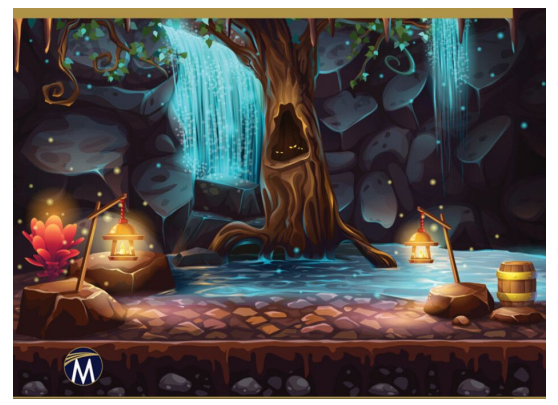

In the background of the image, there should be hidden figures of copy-right free game dev iconography and figures from the book.

Style Reference

I like all of these. I like the AI one on the bottom right, but I'd like to see a bit more detail in the face like center bottom. Bottom left is exactly the kind of hair I want. I like the tone variation in her skin.
