FOOTBASEBALL

Arrange the class into two different teams on each side of the midcourt line. The players are in a scattered position with one team at bat and the other in the field. Number the players equally on each side. That is, the #1 pitcher will face the #1 batter. The batter catches the ball from the pitcher. If caught, the "Batter" may place the ball on the floor or punt it and then run the bases in order. The fielders must throw the ball to the pitcher or relay the ball between players. When the ball is received by the pitcher, the runner(s) must freeze at their last place of running. Each team bats for 2-3 minutes and

continue until all have pitched.
Switch places every time limit.
