Yes, it is an open, honest admission, while also addressing the fact that I'm taking responsibility and am in therapy, as for my sona, no, it was not a part of this, he's not a cub, nor will he ever be, in lore, he's 18, at one point I had chosen 22 for his age, but that felt.. rather off.

Now do you think that covers about everything to release the conversation in private to anyone involved?

As for the history of me and cub, we'd have to go back to when I was around 16, I was a VERY porn addicted person, I used to watch a lot of Beastars content, and as I've stated before, I wasn't aware of the characters ages, I should have researched it before seeking out such content, but it's beyond that now- continuing forward with this, it's that sort of content I got addicted to, essentially cub, even if I didn't realize it at the time, I haven't looked at anything outside of that in terms of what I know now to be "cub" content, and as far as the viewing goes, I don't look at that type of content anymore, and one of the things I'm focused on through therapy, is essentially rewiring my brain, teaching myself that porn isn't worth the while, that such "cub" content is deeply inappropriate and immoral, minors cannot consent, nor can animals. the history ends as of this year, although I haven't actually looked at such

This is proof that omari is disgusting and he should be gone from this fandom

That's true.. I suppose I didn't realize they were that young, I assumed watching the show that the characters were of age, but clearly, this is not the case, I've already blocked e6 on my internet, and ceased looking at it entirely. I will not do that again.

You do have a point, seeing as suggestive is mildly sexual either way.. irregardless, I've made a promise to myself to not do such things ever again.

Right.. that is an important point to address, the ERP with Furgal that Luka is doing started after he broke up with me, and understandably so- hell, I had no idea about Luka's AD account until relatively recently. I don't know precisely how long they've been doing ERP for, but it looks like from the replies section on Furgal's twitter that he has only been doing it for a short while now. I couldn't've done anything to prevent it, as I didn't even know of Luka's AD.

So immediately when Luka opens up an AD Furgal immediately starts erping with him?
