Estonia DAO • DAO Rush Week • BaseX island (loads of tangents) ⚡⚡⚡

Loads of tangents because the only thing I can I think of is the island and events that led me there - most notably the climate change.

01:00 BaseX island? *(but only if shameless plugs allowed)*

I will continue the meeting and will tell you about the island in Estonia: https://basexisland.com/

Mars personal comment

Herding decentralized cats and running all the decisions through DAO - difficult.

I highly appreciate some benefits of DAO as a structure but speed of making decision is not the competitive advantage.

You can read why I decided to rebrand “Island DAO” into BaseX:

Mission statement:

This is 100% personal initiative.

I made some friends during hackathon, some of them are likely to become my business partners.

It wouldn’t be possible without Estonia DAO and MetaCartel DragonQuest hackathon.

Highly recommended watch
