

The 10 week Kahn of the Hill series has concluded. Players used this document to track the progress of everyone who competed each week. Competitors faced off in a first to 5 format and earned between 1 to 6 points per week (1 point for playing their set, plus 1 additional point per match that they won). The top five placements are sequential; after that, a player's placement percentile goes up by the difference in points between their score and the next highest score (e.g., someone who earned 27 points will place 3 ranks lower than someone who earned 30 points).

Min # of points = 1; max # of points = 60
