

**Independent School District of Boise City**  
**Kindergarten Social Studies**

**Course Overview:**

Kindergarten students are introduced to an integrative approach to Social Studies by exploring aspects of self, family and school. As students become acquainted with diverse classmates, they develop awareness of the similarities and differences among individuals in the classroom as well as within the school and community. Kindergarten students develop geographic awareness of their surroundings by using geographic vocabulary, maps, and globes. In history, students begin to develop the ability to think like a historian as they acquire enough knowledge of history to understand the past and present. Students begin to appreciate the influence history has on their daily lives as they identify family traditions and the connections to traditions throughout the United States. They examine why certain events and people are celebrated through national holidays. In economics, students develop and build upon basic economic concepts by understanding how people save and use money.
