

Bodega de Bambu

(Workshop building)

2.Stage May- June 2025

Bamboo, harvest, treatment, transport and storage.

We are grateful that the coffee company CoopeAgri supports the Coliazul project and has donated 320m of 858m of the best Guadua Bamboo. This reduces the material costs.

Now the 320m still have to be harvested, treated and transported.

The rest has to be purchased.

We therefore submit the following application

Bambus from the market:		
538 m Bamboo (from the market)	2690,-\$	
Transport	200,-	
Bamboo as a donation, which has to be treated etc:		
320 m harvest + treatment	850 .-	
Transport from San Isidro	200.-	
Material to organize the storage	100,-	Total
	4040,-\$
