Tips

Ken - findfs # find a filesystem by label or UUID
    findfs LABEL=”<label of filesystem>”
    findfs UUID=”<UUID of filesystem>”
    findfs PARTLABEL=”<partition label (name) of filesystem with GPT partition table>”
    findfs PARTUUID=”<partition UUID of filesystem with GPT partition table>”

David - bython - Python with braces. Because Python is awesome, but whitespace is awful.
    https://github.com/mathialo/bython

JP - gh
    gh auth status
    gh auth login
    gh repo list
