Mysterious Monster

At different times, thousands of people say that they have seen a large animal in the famous lake called Loch Ness in Scotland. For many centuries, people have tried to catch it. People who live there always talk about the mysterious animal in the lake, and many of them believe that it is still there today.

In 1933, John McGregor, a local businessman, saw that the lake began to bubble, and a huge animal with two humps came out of it.

After that, scientists examined the lake with underwater equipment and tried to find out what kind of animal lived there. Of course, they haven't found it yet, because the lake is so deep and so dark.

Tourists from all over the world have visited Loch Ness, they hope to see the monster. They have even given it a nickname "Nessie". Many people even show photos of the monster, but they are usually photos of the pictures of the monster. Scientists suppose that the Loch Ness monster is a dinosaur, which has survived since the Ice Age.

Выберите правильную концовку для предложений.
