

UPSC IAS 2019 Ques

Agricultural soils release nitrogen oxides in environment

Cattle release Ammonia into environment

Poultry industry release reactive nitrogen compounds

Hydrogen enriched compressed natural gas

Dew drops not formed on a cloudy night

Antimalarial drug

Textile fibre

Importance of Himalayan nettle : *Girardinia diversifolia*

Uses of satellite images and Remote Sensing data

Deposits of Methane hydrate

Gases due to burning of Crop and Biomass Residue

Uses of chemical such as carbofuran methyl parathion phorate and triazophos

Pyrolysis and plasma gasification

Uses of cirrus cloud thinning technique and injection of sulphate aerosol into stratosphere

Concerns about microbeads and its releases in environment

Augmented reality and virtual reality images

Denisovan

Functional chromosomes and joining segments of DNA

Pieces of artificial functional DNA

Functions of digital signature

Variable devices in wearable technology

RNA interference Technology

Merger of joint black holes

Multidrug resistance in microbial pathogens

Multiple chronic diseases

Solid waste management rules 2006
