3. ¿WHAT IS HANTY? ¿WHAT SERVICES DOES IT OFFER?

3.1. ¿What is HANTY?

HANTY is an online platform that allows its users to centralize and manage in a more organized and fluid way all those selection and recruitment processes in which they may be involved. Likewise, **HANTY** allows its users to share their experiences and interact with each other in relation to these selection processes.

Additionally, **HANTY** is presented as a technological solution to help entities or organizations that are looking for workers, students for internships or similar, to have a space to manage their own selection and recruitment processes.

Also, **HANTY** collaborates with universities, study centers or others, to invite their own students to use **HANTY** as an option to improve their job search and find that job or internship that best suits them and help them grow professionally. At the same time, universities or study centers will be able to receive statistics with aggregated data to better understand how their students enter the market and how they do so, with the ultimate goal of improving their own services and better understanding the position that their own students end up occupying in the labor market.

In short, **HANTY** is a secure environment in which to coordinate and manage different selection processes, thus facilitating, on the one hand, the search for employment and, on the other hand, the recruitment by companies and organizations of workers and trainees, being a Platform in constant evolution according to the preferences of the users and organizations themselves.

3.2. Platform Functionalities

3.2.2. *Contacts*

This is a feature that allows the user to create a contact list of individuals they have interacted with during the selection process, such as colleagues, interviewees, managers, HR representatives, etc.
