

Bassin's Black Bass with Hank Parker

Reset RNG Manipulation

By DeLittleCat

Introduction

This is a guide for performing Reset RNG Manipulation and some useful data. It works on emulators and consoles. There is little information about how the exploit works, but what there is can be skipped and is denoted by a *. If you find a new coordinate set in a weather type or lake not mentioned in this [section](#), please DM me at speedrun.com/users/DeLittleCat. I'll add it to the list after my verification.

Strategy

1. Make sure you have [these](#) coordinates memorised or written down; linked to their respective lake and weather. *Lake and weather contribute to what fish appear.
2. Reset the console. *Sets RNG state to 0.
3. Start or load a savefile. Progress normally until reaching the boating screen.
4. Reference step 1 to find a coordinate to fish on.
5. Once on that tile, check to see if the fish finder will ping. *The first ping on a pinging tile updates RNG state. Non-pinging tiles do not require a ping to update.
 - 5a. If it does ping, enter the fishing screen.
 - 5b. If it does not ping, you may still enter the fishing screen, at the small risk of the fish refusing to bite. Otherwise, reference a different coordinate in step 1.
6. Catch the preferred fish.
7. Exit the fishing screen.
8. Save your progress on the boating screen by selecting quit or by selecting to save after a tournament.
9. Repeat from step 2 until satisfied.

Coordinates

*Coordinates tell you what tile you are on. *Tiles may have different tile types, meaning different fish can appear. *Some tile types are rarer than the others, meaning there might be few or many coordinates with a preferred fish.

Green Valley Lake

No known coordinates.

Onyx River

Sunny: (32, 43) (33, 42) (39, 29) (42, 29) (44, 30)

Partially Cloudy: (32, 43) (33, 42) (39, 29) (42, 29) (44, 30)

Cloudy: (56, 40) (57, 40) (57, 41) (58, 41) (52, 49)

Bronze Lake

Partially Cloudy: (38, 41) (11, 43)

Cloudy: (38, 43) (38, 44) (38, 45) (38, 46) (38, 48)

Lightly Raining: (40, 41) (38, 43) (38, 44) (38, 45) (37, 45)

Foggy: (35, 54) (25, 54)

Bluestone Lake

No known coordinates.
