

YouTube Monkey Privacy Policy

Last Updated: July 2025

1. Introduction

This Privacy Policy explains how **YouTube Monkey** ("we," "our," or "us") operates and manages data when you use our Chrome extension (the "Extension"). By installing and using YouTube Monkey, you consent to the practices described in this policy.

2. Data Collection

YouTube Monkey is designed with your privacy in mind. We do not collect, store, or transmit any personal identifying information or user data.

- **No User Accounts:** The Extension does not require or support user accounts, so we never ask for your email address, name, or any other personal details.
- **No Server-Side Data Collection:** All features of YouTube Monkey (such as displaying video upload dates, play times, or highlighting popular videos) are processed **locally within your browser**. Your Browse activity and video information are never sent to our servers or any third-party servers.
- **No Analytics or Tracking:** We do not use cookies, tracking pixels, or any other methods to collect usage data, IP addresses, browser types, or device information.
- **No Uploaded Data:** You do not upload any images, files, or personal content to our service through the Extension.

3. Use of Data

Since YouTube Monkey does not collect or store any user data, the concept of "use of data" does not apply in the traditional sense. The Extension solely utilizes publicly available information from YouTube (like video upload dates and view counts) and processes it **within your local browser** to enhance your viewing experience as described in the Extension's features. This processing happens entirely on your device and is not accessible by us.

4. Data Sharing

We do not share any data, as no data is collected or transmitted from your browser by YouTube Monkey. There are no third-party services, payment processors, cloud hosting providers, or AI model providers involved in data handling for the Extension.

5. Security Measures

Given that YouTube Monkey does not collect, store, or transmit any user data, traditional security measures for data in transit or at rest on servers are not applicable to our operation. The Extension functions purely client-side, within the secure environment of your web browser.

6. Your Rights

Since we do not collect or store any personal data, there is no personal information for you to access, update, or delete through our service. You can control the Extension directly through your browser's extension management settings (e.g., disabling or removing it).

7. Children's Privacy

YouTube Monkey is a general-audience extension and is not specifically designed for children. As we do not collect any personal data from any user, this policy fully complies with principles of children's online privacy.

8. Policy Updates

We may update this Privacy Policy periodically to reflect any changes in our Extension's functionality or legal requirements. We will notify users of any significant changes by updating the "Last Updated" date at the top of this policy. We recommend reviewing this policy regularly.
